## CAPABILITY STATEMENT

### CORE COMPETENCIES

Civil Infrastructure Consultants LLC (CIC) was established in 2019 in Woodstock, GA and is a woman and minority-owned small business. CIC is committed to providing **civil engineering** and **construction management services** to federal, state, and local government clients as well as other engineering firms.

Client satisfaction is our highest priority, and CIC takes great pride in delivering projects on time, on budget, and within scope.

#### TRANSPORTATION

CIC engineers have extensive experience in pavement evaluation, pavement management, pavement design, and pavement construction; our team of licensed engineers are poised to provide support tailored to a multitude of unique challenges.

#### RAIL

Our licensed engineers have experience with project scoping, construction monitoring, and administrative management of public projects impacting Class I Freight Railroads. These projects are sponsored by various public agencies and include at-grade and grade-separated crossings as well as parallel encroachments.

#### CONSTRUCTION

With an extensive background in construction, our engineers provide constructability reviews as well as site design and construction support for various types of civil infrastructure.

### DIFFERENTIATORS

- ✓ Highly qualified team with DOT and local experience
- ✓ Use of innovative technology and creative solutions, to drive value, performance, and communication
- ✓ Small company, focused on delivering quality service to customers
