Technology Consulting Group
TCG

CAPABILITY STATEMENT

COMPANY OVERVIEW:

The Technology Consulting Group helps businesses navigate challenging digital landscapes by providing expert technical solutions. Our main services include Active Directory, Identity and Access Management, and Cloud Security. By merging these with a compliant operational framework, we help secure your digital boundaries while enhancing your company's standards. We draw from 30 years of collective cybersecurity experience, ensuring your user data's safekeeping and effective identity management.

CORE COMPETENCIES:

- Architecture Design
- User Account Provisioning and De-Provisioning
- User Account Synchronization
- Single Sign-On Implementation
- Authentication and Authorization of User Accounts
- Multi-factor authentication, including risk-based and password-less (MFA)
- Access Control/Roles-based Access Control (RBAC)
- Identity Governance Including PIM and Entitlement MGMT
- Conditional Access Policies
- Documentation and training

PAST PERFORMANCES:

South Carolina Technical College System:
Collaborated with Coeur Business Group, Technology Consulting Group, and Small Planet Works to develop a state-compliant security plan for the South Carolina Technical College System and its 17 colleges.

Everyone Counts:
Created a comprehensive cybersecurity program for Everyone Counts, a national election management and voter registration company. Consulted on implementing a hybrid active directory, identity, and access management system.

Shelby County Election Commission:
Conducted independent verification and validation (IV&V) for the implementation of 1,500 voting machines for Shelby County, Tennessee.

Deloitte (Azure Identity Governance):
Led the implementation of Entitlement Management in the Azure Identity Governance portal, enhancing security and access control. Configured B2B collaboration through Azure external identities for secure application sharing with external users.

DIFFERENTIATORS:

1. We have proven success; our track record includes successful IAM implementations for Fortune 500 companies.
2. With custom solutions, we tailor our services to fit your unique organizational needs.
3. With 24/7 support, our dedicated team is always available to address your concerns.
4. With strategic partnerships, we collaborate with leading IAM vendors to offer cutting-edge solutions.
5. We can quickly adapt to changing business landscapes.
