# CAPABILITY STATEMENT

## CORE COMPETENCIES

The Georgia Drone specializes in providing stunning, cinematic, full-motion aerial video & photos from the skies of Georgia and the Southeast. We focus on construction, mapping, inspection and thermal imaging projects. Along with providing a unique perspective from the air, using drones also provides cost-effective, low liability risk alternatives to traditional methods. Drones can increase efficiency, safety, while reducing manpower, costs and time.

## CORE SERVICES

Construction Job Site Progression | Construction Site Asset & Materials Management | Aerial Mapping & Inspections | Pre-Construction Vibration Monitoring & Surveying | Aerial Thermal Imaging | Commercial Real Estate | | Ground Videography & Photography | Video Editing

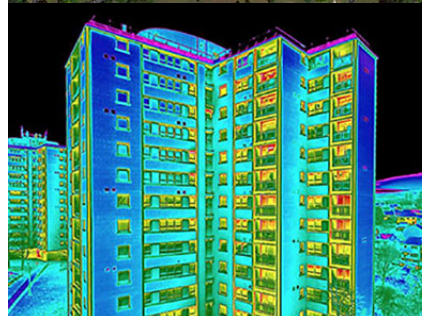

## KEY DIFFERENTIATORS

### USEFUL DATA

We use the latest drone technology and image processing platforms to provide actionable deliverables that assist in making critical decisions.

### INSURANCE & CERTIFICATIONS

We have Part 107 pilots certified by the FAA. We also provide Certificates of Insurance on demand for our clients and primes.
