

# Woody Tom Drums

Quality Hand Crafted Percussion Instruments

- ◆ Beautiful Wood Tones
- ◆ Textured Surface Enhances Brush Play
- ◆ Crisp Clean Snare Effect

"The Woody line of tom drums really extend the options that I have when configuring a setup for every gig. The tones continue in the family of the Studio Cajon and Brush Box that I've become accustomed to. Adding Woodys opens up more dynamic options to support the artists that I play for."

**Dave Woodard**  
Professional Drummer

The Woody tom drums by Croaker Percussion are a high-quality acoustic wood surface tom drum developed to fill the need for an expanded set of wood tones available for those acoustic gigs. The Woody line of tom drums are tuned to give a balanced dynamic range while providing superior sound qualities.

Each Woody is a regular hexagon of varying size and depth with appropriately sized sound ports. The shell is made from solid Maple and the tapa is an exotic veneer on birch plywood providing stunning sonic and visual presentation on stage. The tapa is secured with stainless steel screws and the outer finish is clear lacquer.

All Woody drums can fit in a standard snare basket. Little Woody and The Woody are available with an optional L-Rod mount installed for ease of use and integration with existing systems. The Big Woody is available with optionally installed floor tom leg mounts with legs and include memory locks for quick setup.

Woody drums are available in three sizes.

Little Woody is approximately 14.5" x 13" x 3.5".

The Woody is approximately 18" x 16" x 5.5".

Big Woody is approximately 18" x 16" x 7.5".

Croaker Percussion is dedicated to creating percussion instruments for professionals and those that aspire to play and sound like professionals.
