

Asbestos Awareness

Our Asbestos Awareness course is aimed at providing an awareness of asbestos in the workplace for workers and managers of premises. The course will cover legislation, awareness of types of asbestos containing materials in the workplace and proactive measures to make persons aware of the risks in the workplace.

Course Content:

The course will cover the following learning outcomes:

- Asbestos types and uses.
- Types of products that contain asbestos containing materials.
- The types of activity that could disturb asbestos materials.
- The effects of asbestos exposure to health.
- An overview of Legislation incl. the Control of Asbestos Regulations 2012 (CAR 2012).
- Building controls to manage workplace asbestos.
- What to do in the event of damage or disturbance of ACMs.

This course provides awareness in these areas. It is not intended as competence to work with asbestos or asbestos-containing materials (ACM).

Test of knowledge

There is an end of course test to ensure the learning outcomes have been met.

On successful completion of this course Learners will be issued with a certificate of attendance.

Duration:

½ day
