

## **COSHH Awareness**

**Our COSHH Awareness course is aimed at providing an awareness of the importance of the correct selection, storage and usage of substances hazardous to health. The course would suit anyone who works with COSHH materials or is responsible for the supervision or management of COSHH materials in the workplace.**

### **Course Content:**

The course will cover the following learning outcomes:

- An overview of the Control of Substances Hazardous to Health Regulations 2002
- The types of workplace substances hazardous to health – including specific agents
- The health effects of exposure to substances hazardous to health – including routes of entry following contact
- Source of information and the importance of Data Sheets – Globally Harmonized Hazard identification through labelling
- Control measures to reduce the risk of incident – Hierarchy of Control
- Correct storage and signage of COSHH materials
- Risk assessment of COSHH materials
- COSHH Auditing to maintain safe control of COSHH materials
- First Aid and spill provision following exposure

### **Test of knowledge**

There is an end of course test to ensure the learning outcomes have been met.

On successful completion of this course Learners will be issued with a certificate of attendance.

### **Duration:**

1 day
