September 2023

THE START OF A NEW SCHOOL YEAR

On the 6th of September, AGBS opened its doors to welcome the students. It's the beginning of a new chapter for all the students, especially for our seniors, but also to the new students that chose AGBS to be their school. The school was ready to receive the students, and it was with a lot of joy that the teachers met the familiar faces and the new faces. The teachers always want the best for the students, and they are committed to prepare them for their future. The teachers and the administration want to see the students with a big smile and excited because they will learn. Our school cares about us! In our first day, we went to explore the changes in the school like the new area for sports. We are truly excited! Let the new school year begin.

Message from Dr. Mensur Ibrahim

Dr. Mensur, the Principal of AGBS, always has his office door open to the students. In our first day at the school, we have noticed that many changes were made, so we decided to praise Dr. Mensur for the changes. He told us that "change is good as it enables the students to think". He truly hopes the school to have a huge impact on the society of Kuwait. Dr. Mensur and the AGBS staff are working tirelessly to improve the reading habits of our students.

The Future Started at AGBS

Stars of the Month

MEET YOUR *teachers*

MR. EFOSA
ENGLISH TEACHER

Q: When did you decide to be a teacher?

A: The passion started when I was assigned to a school in a remote area of my country. Many students spoke little or no English, and by the end of the school year, most of them gained a good understanding and use of English language. This factor motivated me, and I found a new passion "Teaching English as subject and a tool for communication".

Q: How did you feel in your first day in AGBS?

A: My first day at AGBS was a joyful and thoughtful day.

Q: What's your plan for your students?

A: I plan to tirelessly groom AGBS students to the point where they compete with core British and American students for international prizes. I see this happening someday.

Q: A message to the students.

A: My message to the students: Success is predicated in continuity, continue to work hard, continue to be patient in learning, continue to nurse the dream of becoming great... One day, your dreams will become reality.

Q: What do you enjoy more in your occupation?

A: I studied Math with a lot of love because my uncle taught me Math in such a simple way. He was the one that made me love Math.

Q: How did you feel on your first day at AGBS?

A: Excited to meet the students. It's the first time that I teach in Jahra.

Q: Why did you choose AGBS?

A: Because of its reputation. I have heard good things about the school and now I am really happy I made this choice because I met very nice colleagues.

Q: A message to the students.

A: To my lovely students, it may take some time to achieve your goals, but eventually, you will. So be patient and work hard for your dreams, and they will come to you.

MS. FATEMAH
MATH TEACHER

MS. GUNEL
HOMEROOM TEACHER

Q: Why did you choose AGBS?

A: I chose to work at AGBS because of the positive energy I felt the moment I took a step inside. It's a very genuine environment and encourages me to work harder.

Q: What would you like to see in the school?

A: I would like to have a smartboard instead of a whiteboard. It saves time for teachers.

Q: What is your biggest dream?

A: My biggest dream is to be successful.

Q: A message to the students.

A: Never stop trying. Your mind is your limit, there is nothing you cannot achieve, as long as you believe, you can. Trust yourself, believe in yourself, and never give up trying.

HOW I SPENT MY SUMMER VACATION

by Saleh A. Al Jabri - 10A

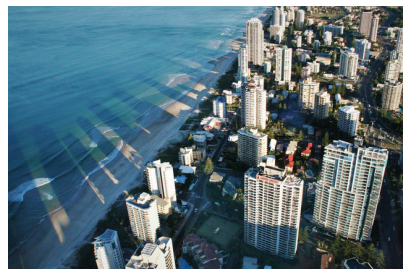

My summer vacation was really special.

I traveled with the club called Almhali and our trip was to Malaysia, Indonesia and Australia. First, we stopped in Riyadh, for a few hours for transit, and then we were off to Jakarta, Indonesia. There we visited museums, parks and explored the city. We stayed in Jakarta for a few days and then we went to Bali.

Bali is like a paradise on Earth. The hotel was beautiful! In Bali, we went to the biggest water park of Asia. It's called Water Boom and it's a very fun place. We stayed a few days in Bali and from there we went to Australia, more precisely to the Gold Coast. Again, it was like paradise! The city is really beautiful, and we've visited lots of fun parks and rollercoasters. We even went to the Zoo, and what made me excited was to see kangaroos, koalas, and all the animals Australia is known for.

On our last day, we went on a boat trip, and we rode a jet ski. It was really fun! We stayed in the Gold Coast for a week and after that we went to Malaysia, to its capital Kuala Lumpur. Once again, we had lots of fun. Malaysia is an adventurous country, and there we went to another water park called La Goon that has the biggest waterfalls in the world. After exploring Kuala Lumpur, we came back to Kuwait, but we stopped first in Jeddah.

This trip was really memorable as I made lots of new friends and I had a lot of fun with them.

WHEN THE FUTURE STARTED AT AGBS

live
your
dream.

by Mohammed S. Alajmi - 10A

Alhumaidi Saad Alajmi

Was a student at AGBS.

He graduated in 2023 and left us a message:

"In the last school year, I was a senior and as a senior, we organized many events at the school.

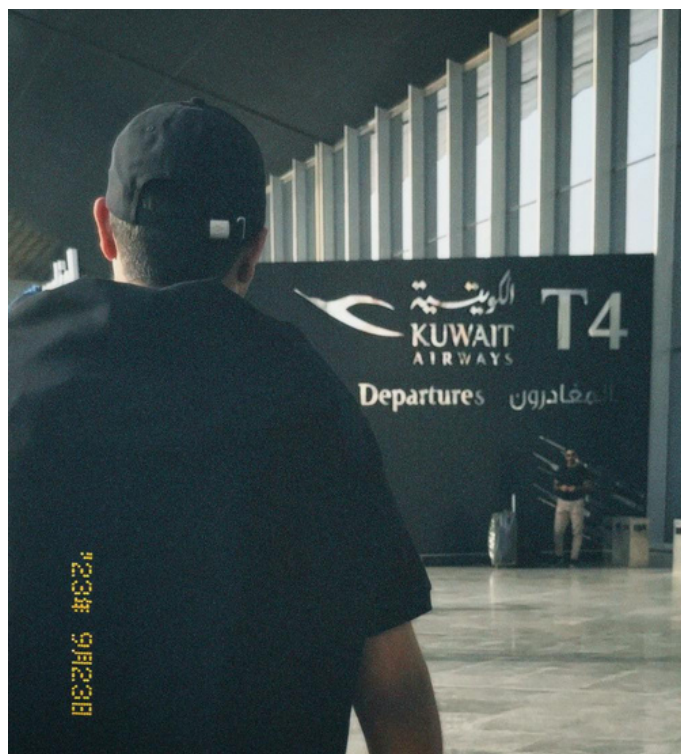

We organized a bazaar, the International Day, the Breakfast Day, etc.

It was the most wonderful school year!

On the 15th of September I will travel to the UK to study Medicine. This was my dream and I have worked very hard to achieve my dream.

My advice to all the students in AGBS is to study hard to become what you wish for.

Good luck to all!"

UPDATE :

Alhumaidi is already settled in England. He is in Bournemouth, and he is living in a family house. The owner of the house is a woman named Darcy, and she is a therapist and a designer. Alhumaidi said she is really friendly and kind. He is studying in Kaplan International Languages. He already had the first classes and met some colleagues, including Rashed, a friend from Kuwait. He is very excited about what the future holds for him. He already misses Kuwait, especially his family and friends but he is following his dream.

STARS OF THE MONTH

My name is Abdulrahman Sultan and I study in Grade 10.

Since I was 9 years old, I started playing football as a left back, and my first match was in Ethiad Academy.

When I was 10, I signed for Jahra F.C. and that's where I am still playing as a left wing.

To be a football player means hard work. After school, I train every day in the club and then I have to study too. Sometimes, I sacrifice my free time with my family and friends to play football, but I still love it.

The players that I like most are Cristiano Ronaldo and Gareth Bale, and in Kuwait, my favorite player is Fahad Al Enezi, a Al-Salmiya SC player.

Last year, at the age of 14, Kuwait National Team called me to join the National Team. I was so excited and so proud to play for our country and to wear Kuwait's colors.

My name is Ali A. Alramzi and I am in Grade 5.

I am 11 years old and I love to create my own stories with well-known heroes.

I make the drawings and through my drawings you can follow the story I created.

When I grow up, I would like to be an actor and an artist at the same time.

I also love to read and my teacher, Ms. Pooja, says I am very good at reading.

AGBS FOR OCTOBER

Our Elementary students, from grades 1 to 6, will go on a school trip to KidZania, located in The Avenues. We hope that you guys have a lot of fun!

From the 15th to the 23rd of October, AGBS will host a massive football tournament with the presence of all private and bilingual schools of Kuwait.

C'mon AGBS!! We will be cheering for you!

AGBS NEWS HOW IT STARTED...

In our first Elective classes, we decided that it would be interesting to create a "newspaper" for the School.

The idea soon became reality.

We brainstormed and everyone gave their ideas for its content.

We interviewed students, teachers, and the principal. We selected what we wanted to show in this first edition.

We hope that you enjoy it, as much as we enjoyed creating it.
