# THE BEST HOMES ARE GRUNDFOS HOMES

Your customers deserve the best. With a Grundfos water solution, homeowners will enjoy the benefits of supreme quality and efficiency – and you will enjoy how easy it is to install. Read more about our products on the following pages.

## WATER SUPPLY

**1** PRESSURE BOOSTING

**2** GROUNDWATER

## WASTEWATER

**3** LIFTING STATIONS

**4** DRAINAGE

## HOT WATER

**5** HOT WATER RECIRCULATION

# BOOST THE WATER PRESSURE

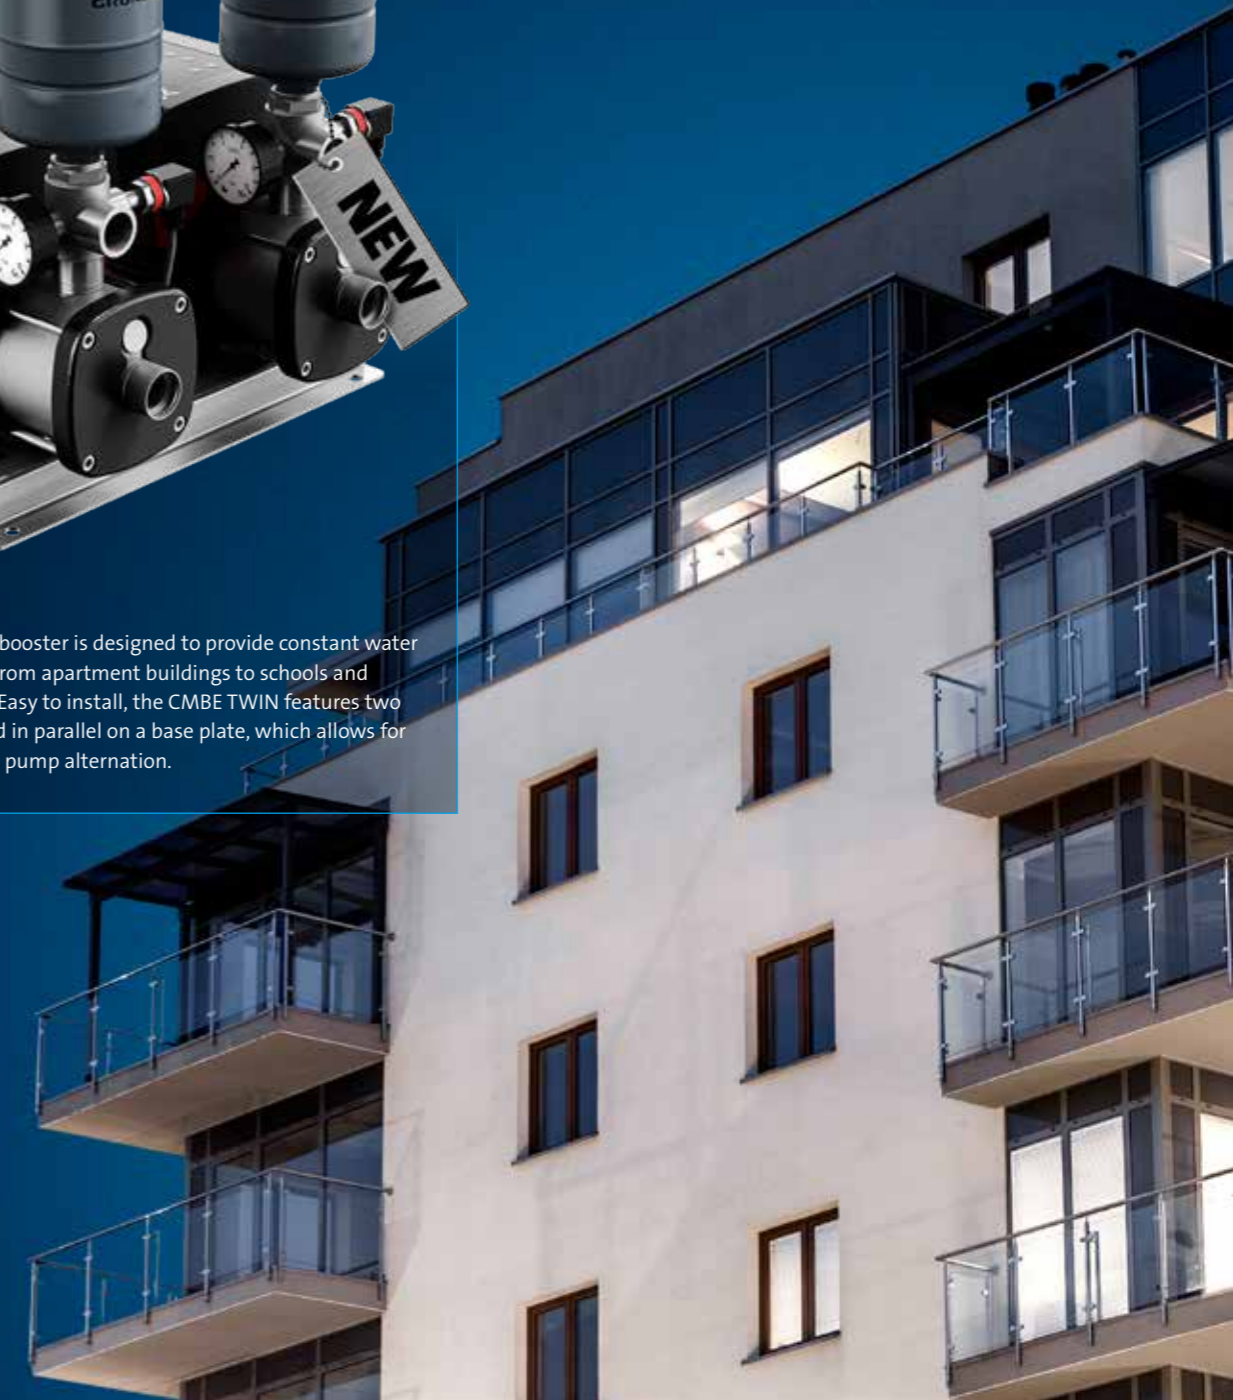

## SCALA2

SCALA2 is a compact, all-in-one booster pump that will provide perfect water pressure in the vast majority of residential buildings, whether boosting from mains, tanks or wells. This single-variant pump is not only very easy to pick up and install – it is also outdoor-ready.

## CMBE TWIN

Our new compact twin booster is designed to provide constant water pressure in everything from apartment buildings to schools and small industrial plants. Easy to install, the CMBE TWIN features two CMBE pumps connected in parallel on a base plate, which allows for full cascade control and pump alternation.

## MQ

The MQ is a compact all-in-one pressure booster for use in homes and gardens. Easy to install and operate, the MQ can pump potable water or rainwater with very little maintenance.

## UPA

The low-noise UPA mini boosters are the perfect choice if you need to boost water pressure in up to 4 taps. They are extremely compact and easy to install.

## CMBE

The CMBE with integrated speed control provides constant water pressure in residential applications – and even lets the end-user increase or decrease the pressure level at the touch of a button.

## CMB

The CMB is available in variants with pressure managers (PM1 and PM2), pressure tanks (PT) and pressure switches (PS) for use in a wide range of residential and commercial applications.

# INSTALL GROUNDWATER SOLUTIONS **WITH EASE**

## SQ

SQ is a handy and installer-friendly submersible pump for groundwater supply from deep wells (> 8 metres). The built-in electronic motor controller offers excellent motor protection, while the permanent magnet motor ensures high efficiency.

## SQE

The SQE does everything the SQ does, but also lets you offer your customer the comfort of constant water pressure. The variable-speed drive eliminates weak or fluctuating water pressure by automatically balancing supply and demand. This requires the additional installation of a CU301 control unit.

## SBA

SBA is the all-in-one submersible booster pump you need when pumping water from shallow wells (< 8 metres) or ground tanks. It is built on the field-proven SB platform and includes an integrated control unit for automatic operation, so you don't have to install an external pump controller in your customer's home.

## SB

SB is the proven, low-noise performer in boosting, built from durable high-quality composite and stainless steel. An external controller (Grundfos PM1 or PM2) is needed for automatic operation.

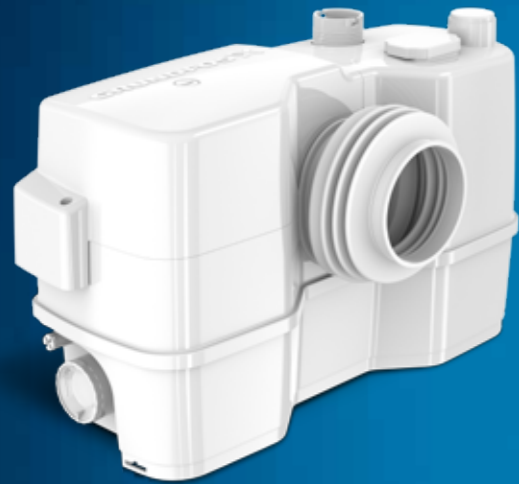

### 3 LIFTING STATIONS

# INSTALL A BATHROOM ANYWHERE

## SOLOLIFT2

The SOLOLIFT2 range of lifting stations lets you install a toilet or bathroom even in places where there is no access to a gravity drain pipe. All five models in the SOLOLIFT2 range have an integrated lift-out pump unit for easy maintenance and repair.

### WC-3

One toilet and three further sanitary appliances.

### WC-1

One toilet and one further sanitary appliance.

### C-3

Grey wastewater from dishwashers, basins, showers, bathtubs etc.

### D-2

Ultra-compact variant for dewatering of showers, sinks etc.

### CWC-3

Slim variant for front-wall installation – one toilet and three further sanitary appliances.

### 4 DRAINAGE

# CHOOSE THE RELIABLE DRAINAGE SOLUTION

## UNILIFT CC

Ø10 mm particles / dual outlet

The UNILIFT CC is a light-weight submersible drainage pump with a dual outlet (top or side) that gives you a lot of flexibility in installation and/or replacement. It will pump water down to 3 mm above floor level with the strainer detached and - like our other drainage pumps - can be used in permanent installations or as a portable pump.

## UNILIFT KP

Ø10 mm particles / top outlet

The robust design makes the submersible KP wet-runner drainage pump ideal for rough environments. Can be delivered with a float switch for automatic operation.

## UNILIFT AP

Ø12-50 mm particles / faster drain

If you need a faster, more powerful submersible drainage pump, you can't go wrong with AP (top outlet) or AP BASIC (side outlet). Can be delivered with a float switch for automatic operation.

### 5 HOT WATER RECIRCULATION

# PROVIDE HOT WATER INSTANTLY

## COMFORT

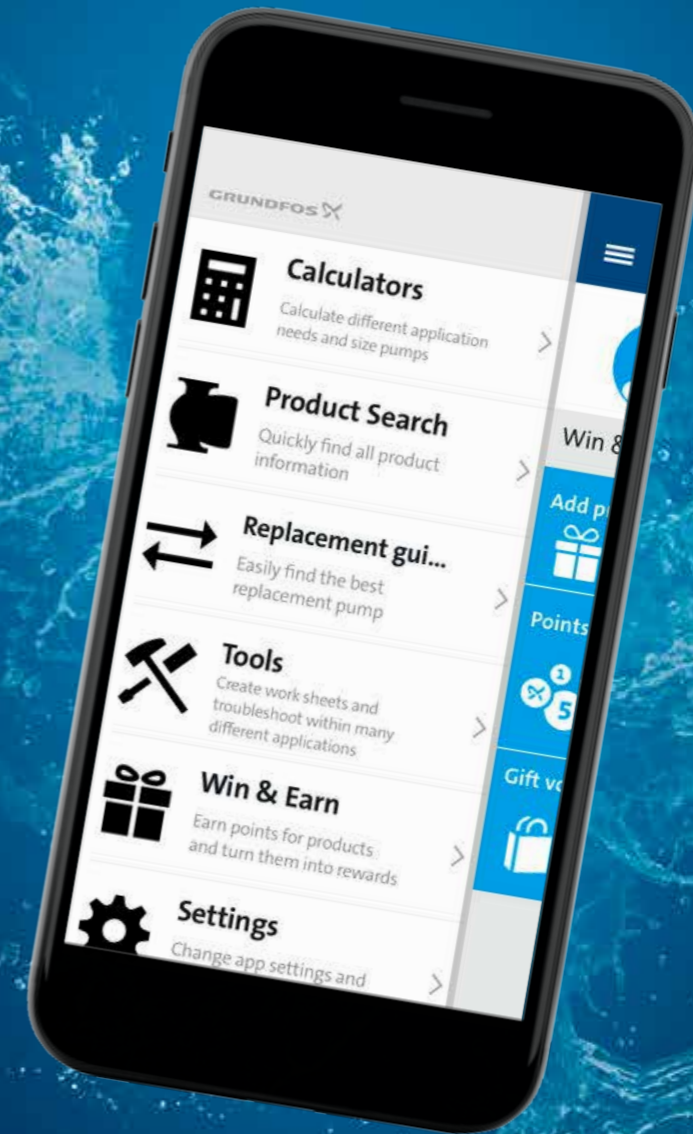

With COMFORT and a return pipe, you can offer your customers the luxury of never having to waste time waiting for tap water to get warm again – while also setting new standards for the efficient use of water and energy. Models with AUTOADAPT - which automatically adapts performance to usage patterns - are designed for use in systems with hot-water tanks.

# THE BEST TOOLS FOR INSTALLERS

# ...AND THE BEST APP

## GO INSTALL

Grundfos GO Install is the #1 app for installers who work with Grundfos pumps. The app includes all the information and tools you need to choose the best product for the task and install it as quickly and easily as possible.

- Pocket library of pump and system knowledge
- Guides to pump selection and replacement
- Calculators designed for pump installers
- Step-by-step troubleshooting guide to pumps and applications
- Grundfos product database

**MAKE YOUR WORK EASIER**  
DOWNLOAD GRUNDFOS GO INSTALL

Join Grundfos for Installers to get access to ECADEMY and WIN & EARN – along with regular news and updates on pump technology and installer events in your area.

With WIN & EARN, you can register the Grundfos products you install to earn points for gift vouchers and enter draws for great prizes.

ECADEMY offers short online training courses on the Grundfos pumps and pumping applications you work with the most or would like to know more about.
