Spider-Man 2 Game Production Announced

BURBANK, California -- Production of the new Marvel Spider-Man 2 video game breaks ground on June 15, 2022, using the new Unreal 5 game engine, Insomniac Games CEO Ted Price announced on June 10. This game is the 2nd in the series. Spider-Man 2 release is set for December, 2023, in time for the holidays.

"With Unreal 5, never before seen graphics and output rates allow us to bring the best Spider-Man experience imaginable," Insomniac Games Founder, Ted Price said. "With a completely new story, over a thousand customization combinations, and a brand new co-op mode, this game will address any problem we had with the previous installment. Everyone here at Insomniac Studios California is working day and night to bring the freshest gameplay possible to all next-gen consoles."

Price says PlayStation surveyed 300 professional gamers from the United States, who critiqued Spider-Man 1 over a course of 3 weeks to assess the top 10 most problematic areas, and 10 most sought after upgrades, suggested for game enhancement. The findings will be tested and incorporated. The game testers have signed non-disclosure agreements and shall not be named.

Spider-Man 1 debuted in 2019 following a movie release of the same name. According to sales figures from 2018, Sony Interactive Entertainment earned \$4.88b in revenue, a 27% increase from the previous year. Sales of the second version are expected to exceed 2020 numbers.

Founded in 1994, as Xtreme Software Inc., Insomniac Games promotes positive messages. We tell stories about good overcoming evil. We focus on positive themes like friendship, self-sacrifice and fighting for the greater good. We walk the walk ourselves through our inclusive workplace culture and industry leadership.
