U.S. CONGRESS

MARTIN LUTHER KING DAY

I wish everyone a meaningful Martin Luther King Day.

Dr. King is an American hero, cemented in American history, for his liberation of racial minorities, and also for his combating a gross establishment that destroyed lives all over the globe.

"FOUR DIED TRYING" is a documentary detailing the assassinations of four American heroes, including Dr. Martin Luther King, who worked to expose and end the Military Industrial Complex's Vietnam War.

During his final year of life, King called for an immediate withdrawal from Vietnam. His rallies focused on ending that war which had wasted billions of US Dollars and lost priceless lives, foreign and American. Before he was assassinated, King planned a half-million-man march on Washington, calling it a multi-racial "Poor People's Campaign" to occupy DC in order to force an end to that war.

King is but one American Hero who would die mysteriously while combating the Military Industrial Complex.

"There is abundant evidence of a major, high-level conspiracy in the assassination of my husband," so declared Coretta Scott King, widow of the late Dr. King, just after a 1999 civil suit concluded that her husband had in-fact been murdered in a conspiracy that included "governmental actors."

So, I encourage everyone today to watch the documentary titled "FOUR DIED TRYING," which is available for streaming on most platforms.

And let's not just remember our American Heroes who died fighting.

Let's honor their lives by picking up where they left off.

Let's fight their fight.

Let's speak truth, so that peace might prevail.

Let's reclaim Washington for the everyday Americans.

Sincerely,

Preston Gabriel Nelson
