

HOW & WHERE WE TREAT FOR RODENTS

Enviro Pest Control **strategically applies treatment** to key areas where rodents travel and nest.

Here's **how** and **where** we treat, and **how to prepare** for your service.

WHERE WE TREAT

BEHIND APPLIANCES

We pull out and inspect behind refrigerators, stoves, and other appliances and treat these areas.

KITCHEN & FOOD AREAS

We treat along walls, cabinets, and corners where rodents search for food and water.

BASEBOARDS & ENTRY POINTS

We treat along baseboards, gaps, and small openings where rodents enter and travel.

UTILITY CLOSETS & CORNERS

We treat in utility closets, storage areas, and other hidden spots where rodents hide and nest.

HOW TO PREPARE

CLEAR KITCHEN SURFACES

Clear countertops, stove, and top of refrigerator. Remove food and clutter.

CLEAR AROUND APPLIANCES

Clear the area around refrigerator and stove. Technician may pull appliances out to inspect behind them.

PROVIDE ACCESS

Ensure access to utility closets, storage areas, and other spaces where rodents may hide.

SECURE PETS

Keep pets in a separate area during service.

REMOVE CLUTTER

Clear items blocking walls, corners, and baseboards.
