

CAMP 2000 After School Program

Our program will allow your children the opportunity to be involved in our exciting enrichment activities weekly. The program provides a structured learning atmosphere. We are here to support the community and help any child who needs access to an after-school program.

Our goal is that each student completes their homework assignments, and to provide a conducive learning environment that makes learning enjoyable. Our staff provides the necessary assistance that helps parents, so that they can encourage their children by providing the information each child needs to complete their assignments.

Additionally we provide free snacks, computer technology, math, reading, writing assistance, sports, yoga, trips, arts & crafts, projects, sewing and cooking. Take advantage of this great opportunity!
