METALS, EXTRUSION, FOUNDRY

ALUMINIUM FOR THE GREEN TRANSITION

INTERNATIONAL EXPO FOR:

- ▶ TECHNOLOGICAL INNOVATION
- ▶ ECO-SUSTAINABILITY
- ▶ CIRCULAR ECONOMY
- ▶ MANUFACTURING COMPETITIVENESS
- ▶ ENERGY SAVING
- ▶ INDUSTRIAL TRANSITION

The entire production chain is present

For **25 years METEF** has been the reference point for the industrial production chain of aluminium, from raw primary metal and secondary metal, obtained from recovery and recycling, to technologies, plants and products for transformations, processing, finishing, assembly techniques, engineering and simulation, machines and installations, the production of parts and components and end applications, with focus also on the ferrous metals foundry sector.

An unmissable appointment which enjoys the support and patronage of the main national and international associations of the sector, and which is aimed at professionals focused on the development of the metallurgical industry through **sustainable** innovation.

The meeting point of the aluminium supply chain: production, transformation and intermediate processes, recovery and recycling.

metef

The product sectors

RAW MATERIALS

- Production technologies
- Processes and products
- Producers of raw materials

DIE CASTING

- Machines
- Dies and deburring dies
 - Steels for tools
 - Lubricants and releasing agents
 - Design and simulation software solutions
 - Producers of diecast parts

NON-FERROUS METALS FOUNDRY

- Plants
- Equipment and products for gravity casting, the best technologies offered by domestic and international leading manufacturers
- Producers of castings

FERROUS METALS FOUNDRY

- No bake green sand moulding plants
- Shell-moulding machines
- Sand recovery and processing machines
- Furnaces and refractory
- Moulding auxiliary products
- Producers of castings

EXTRUSION

- Extrusion presses
- Dies
- Handling systems
- Thermal treatments
- Profiles processing
- Automatic warehousing systems, varied equipment and all products at the service of the extrusion cycle
- Producers of extrusions

ROLLING

- Machines
- Auxiliary equipment and technologies at the service of the rolling cycle
- Producers of rolled products

ENGINEERING AND SIMULATION

- METEF will host leading companies in the engineering and simulation field committed to the most innovative solutions in terms of CAD/CAM software for the metallurgical production processes

FINISHING AND MACHINING

- Finishing treatments, joining techniques and machining: the most innovative techniques up-to-date processes and environmentally friendly solutions by international leading operators

RECYCLING

- Machines, techniques and advanced systems as well as operators and companies in the refining and remelting sector for the recovery and recycling of metals targeting energy efficiency, sustainability and environmental protection

NEW ORGANIZATIONAL STRUCTURE, NEW LOCATION AND NEW ALLIACES TO PROMOTE ALUMINIUM AS WELL AS THE ADVANCED, COMPETITIVE AND ECO-SUSTAINABLE MANUFACTURING INDUSTRY

NEW ALLIANCES TO DEVELOP SYNERGIES, RELAUNCH AND CONSOLIDATE THE BRAND

In 2019 Veronafiore and Bolognafiore signed a 50-50 joint venture for Metef, with the aim of promoting the metallurgical and advanced manufacturing industry, strongly linked to aluminium, a versatile, sustainable and environmentally friendly metal, symbol of the circular economy and which underpins all industrial developments.

To complete this phase of renewal, the organization of the event has been entrusted to Senaf Srl, a company that organizes trade fairs, exhibitions and events dedicated to the various sectors of the industrial and manufacturing industry in Italy and around the world. Senaf will manage the project in partnership with the historic and consolidated team at Metef.

metef

EXHIBITING AT METEF COMES WITH A SERIES OF ADVANTAGES

Meet visitors at the top of the decision-making ladder

Benefit from a matching service to encourage meetings with delegations of international buyers

Central location, amid the most important national manufacturing and metallurgical industry districts

Digital communication tools to consolidate and communicate your presence at the event

Visibility generated by an intense communications campaign in Italian and international specialised publications and national and local newspapers

Benefit from the synergy generated by the event **MECSPE** that will take place in tandem

THE FIGURES OF METEF AND MECSPE (figures from the 2022 edition)

VISITORS OF METEF

VISITOR PROFILE

Purchase managers
Engineers
Technical Department Managers
R&D Managers

REFERENCE SECTORS

Transport
Construction and building
Packaging
Mechanics and electromechanics

THE RANGE OF PROPOSALS FOR PARTICIPATION AND THEIR EXHIBITION COSTS

The stand is the most visible element and must be designed according to your target and the corporate image you want to communicate. The function of the stand varies depending on whether you want to just showcase products, demonstrate the use of machines and devices, or welcome your clients in a lounge and refreshment area.

Once you've identified the type of stand you need, you can choose how to fit it out.

Raw space: fit-out to be carried out by the exhibitor, starting from 24 sqm;

Standard pre-fitted stand: mandatory for stands measuring up to 24 sqm;

Prestige pre-fitted stand: for stands measuring 32 sqm or more. In addition to the advantages of the standard pre-fitted ones, this type of stand allows for great customisation with a vast selection of furnishings and colours;

Formula Start 12 sqm: provided by the event's official fitter.

RAW SPACE - The solution for companies with their own booth, starting from 24 sqm for **€ 199.00/sqm**
Registration fee € 550.00 + Essential Services* € 10.50/sqm

STAND WITH BASIC FITTING

Area starting from 16 sqm - Mandatory fitting for stands measuring up to 24 sqm

This formula includes: area with 1 open side, fabric walls (h.3 metres), sign with company name, carpet, a table, 3 chairs, courtesy kit for hanging signs (4 hooks with wire) waste basket, coat hanger, power and lighting.

€ 289.00/sqm (area € 199.00/sqm + fit-out € 90.00/sqm)

Registration fee € 550.00 + Essential Services € 10.50/sqm

STAND WITH PRESTIGE FITTING

Area starting from 32 sqm

This formula includes: area, fabric walls (h.4 metres), carpet (colours to be chosen from the range available), sign with company name, closet, reception desk with stools, furnishings and courtesy kit for hanging signs (4 hooks with wire).

€ 334.00/sqm (area € 199.00/sqm + fit-out € 135.00/sqm)

Registration fee € 550.00 + Essential Services € 10.50/sqm

START FORMULA 12 sqm

Reserved for first-timers only

Includes: area with 1 open side, fabric walls, sign with company name, carpet, table, chairs, courtesy kit for hanging signs (4 hooks with wire) waste basket, coat hanger, lighting and power, registration fee.

€ 4,144.00 all inclusive - Registration fee included

+ Essential Services € 10.50/sqm

N.B. Additional open sides: +7% each

You can view the various types of fit-out and furnishings (display cases, chairs, storage room etc.) in the part of the official fitter's website dedicated to exhibitors.

* "various essential services": single-phase connection and testing of the electrical system, with maximum power used up to 5 kW, 1 WI-FI internet connection, fire extinguisher supply according to law, municipal advertising charges on signs and the Exhibitor's company name, ordinary cleaning of the stand - € 10.50 + VAT per sqm.

All stand images are purely indicative.

Special initiatives

For 25 years, METEF has been proposing, at an international level, the most important strategic/economic topics for the industrial segment of aluminium and metals in general, from technologies to commercial and trading aspects, from eco-sustainability to environmental and energy issues.

Recent highlights include: conferences, round tables, conferences and special initiatives dedicated to **green aluminium**, access to raw materials, trading standards, extrusion and foundry, recycling and circular economy, international agreements for the exchange of technologies and knowledge, and special ad hoc initiatives such as the **AITAL Village** for surface treatments. Also of great importance are the **Foundry and Die-casting Marketplace** and the Sinfonet Area with the University.

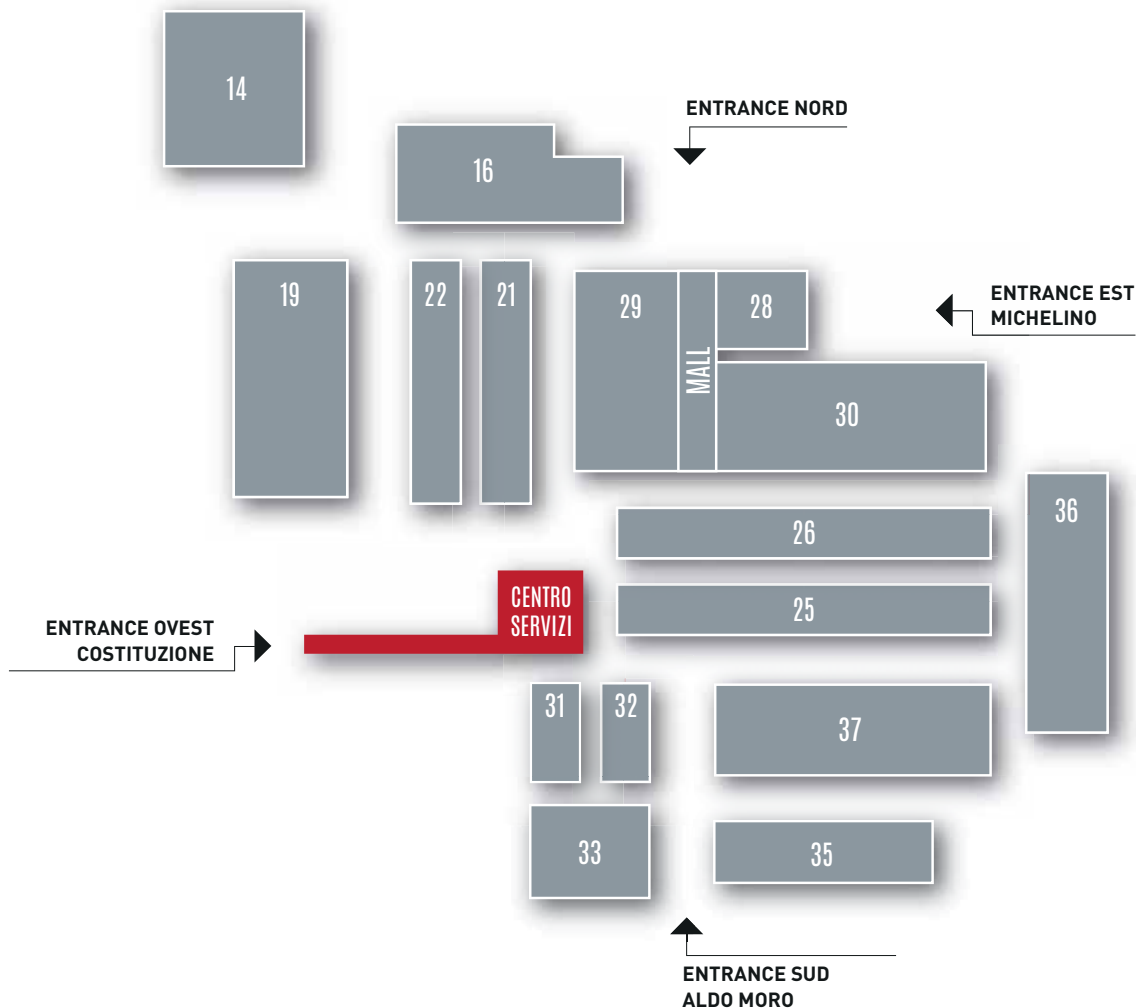

Also on the agenda for the next edition of METEF will be vital topics for companies in the sector, such as new supply routes for raw materials, energy costs, the use of light alloys in the cars of the near future, structural castings, new alloys for extrusions, rolled products and castings and, last but not least, the growing development of recovery and recycling within the entire industrial chain of aluminium and its alloys.

METEF is research and development, it is the incentive for companies to look ahead. The essence of this commitment is the "**Metef Innovation Award**", an initiative that has been consolidated for over a decade that enhances the innovative content proposed by exhibiting companies.

The exhibition centre

metef

Metef will take place at the international exhibition facility Bolognafiere, centrally located amid districts of the nation's manufacturing and metallurgical industry, home to the event MECSPE, which will take place in tandem. Despite being held in separate pavilions, both events will **join forces to develop synergies and achieve common targets**. A strong alliance between two well-known events, both consolidated in their respective reference markets, for a **complementary and complete product range offering**.
