

PETROCOATZ

OIL FUEL, WATER & DIRT REPELLANT FOR CONCRETE

PetroCoatz is a ready to use, quick drying, multifunctional, water-based concrete protectant containing a new generation, invisible, and VOC compliant emulsion of silane, siloxane, and synthetic polymers. **PetroCoatz** effectively protects concrete pavements, natural or synthetic stone surfaces, chemically hardened concrete to resist the penetration of water and oil. **PetroCoatz** penetrates the surface, forming a long-lasting oil and water repellent treatment that retards the penetration of these contaminants.

BENEFITS & FEATURES

**Oil, Fuel, Water &
Dirt Repellant**

Resists Staining

**Low Odor
Formula**

Does Not Wear

**Maintains Slip
Resistance**

Easy Application

WHY SHOULD YOU USE PETROCOATZ?

OIL, FUEL, WATER & DIRT REPELLANT

PetroCoatz protects concrete from contaminants like oil, fuel, water, and dirt. If your concrete floor comes in contact with oil, it can result in stains. It's important for your concrete floors to be waterproofed to prevent moisture from intruding the surface as this can cause structural damage. Over time dirt and other contaminants can lower the integrity of your concrete flooring and cracks may form and expand.

It's extremely important to seal your concrete as it is a porous material and acts like a sponge, over time concrete slowly breaks down while its surface is wearing away.

PetroCoatz effectively protects concrete surfaces from unwanted contaminants.

When you use PetroCoatz, your concrete floor is protected from oil, fuel, water & dirt!
