

As this homeowners' children grew older, they wanted to make changes to the worn-out bathrooms and redo the kitchen to fix the island and make it more of a gathering place. We started upstairs and removed the clunky existing island but decided to keep the perimeter cabinets. The new blue island is a show stopper with amazing Cambria Portrush quartz. This led to updating the floors for the new configuration and some improvements to the beverage center too. We completed the kitchen makeover with new backsplash tile that goes perfectly with the quartz tops and new pendant lighting over the island. In all 3 of the bathrooms we saved the vanity, toilet, tops and vanity faucets, replacing all the other components. We installed all new shower and floor tile in a larger more modern format with latex based grout for easy maintenance. In the jack and jill bathroom it was time for the tub to go and be replaced with a new shower in the same footprint. We added new coordinating shower fixtures and niches. The lighting and mirrors were updated and we finished off all the showers with heavy frameless barn door style enclosures. We painted all the affected rooms and replaced or refinished most of the flooring in the entire house. Be sure to visit the Virtual Tour to see the cool blue island.

SPECIAL FEATURES

- Cambria Portrush quartz countertops
- Delta plumbing fixtures with Blanco sinks
