Have you ever wanted to bring your hotel room home? For this client, we combined the styles for three of her favorite hotels across the world to design this bright, extravagant bathroom.

Spa-inspired, we covered the walls in a lavish marble tiling and installed gloss pebble flooring in the shower. We carved a niche and shaving shelf to add those luxury conveniences. Opposite the shower, we installed an Italian gloss vanity under a cement trough sink the client requested, complemented with wall-mounted faucets. Our designer custom-made mirrors to complete this section, followed by a custom make-up vanity from our shop. We individualized it with a white, reverse painted glass top and drawer front; finishing it off with an integrated light mirror. We partially demoed the wall leading to the water closet to open up the space but keep needed privacy. In the same vein, we installed frosted french doors from the bedroom, matching the style of the new eight-light pocket door to the closet. In which we installed a unique organizational structure with a stately lazy susan.

Finishing this space, we transport this client into her own grandiose hotel spa every day.
