H.R. 5: A Danger to Religious Freedom.

Former Solicitor General Ken Starr argues that the Equality Act is not only a "clear and present danger" to the freedom of Americans' conscience, but also the "greatest threat" to religious liberty. Earlier this year, the House passed the pro-LGBTQ bill by a narrow margin which amends the Civil Rights Act of 1964 by including "sexual orientation" and "gender identity" in the list of protected classes in education, employment, and public places. The Equality Act is a clear and present danger to something that is foundational to our constitutional order, our religious liberty, and that is freedom of conscience. The coercive powers of the government are going to be boldly expanded if the Equality Act is passed into law. The text of the Equality Act explicitly forbids individuals from using the Religious Freedom Restoration Act of 1993 (RFRA) to sue based on claims within the Equality Act explained Christian Headlines. Senators were told that the proposed law would close or punish thousands of religious organizations. The RFRA law, signed by President Clinton, prevents the government from substantially burdening a person's exercise of religion. Enforcement of the pro-LGBTQ law would make it illegal for Christian business owners to deny services that compromise their faith, celebrating behavior that is condemned in the Bible as immoral. As it Was in the Days of Noah

During Noah's time there was a geographic pole shift known as an Axial Pole Shift. Before Noah, the Scriptures describe a perfectly temperate climate without rain, and hence the earth was only watered from the mist which came up from the earth (Gen 2:5-6). Before the flood, the entire earth was in thermal equilibrium without storms as its north/south poles were parallel to the sun's north/south pole. God brought the flood by breaking up "all the fountains of the great deep" and by "opening up the windows of heaven" (Gen 7:11). God caused the entire planet's axis to shift 23.5 degrees (according to science) from the plane of the ecliptic; meaning, that the north/south poles of the earth were no longer parallel with the sun's north/south pole but at a 23.5 degree angle. This angle causes uneven heating of the planet as it rotates on its axis each day which causes storms and all the existing weather patterns we have had since. In *The Endtimes Are Now!* February, 2019 was an article "Earth's Magnetic Pole is Experiencing A 'Sudden Shift'". The movement of the north magnetic pole has been the object of study since 1831. It was tracked moving into the Arctic Ocean at a rate of about 15km per year. But, since the mid 1990s it has picked up speed and is shifting at a rate of about 55km a year. In addition the earth's magnetic field has been getting weaker and has many experts concerned that

we could soon experience a catastrophic pole flip which will be a cataclysmic event beyond anything we have ever experienced. In Revelation 6 John gave a perfect description of a geographic pole shift known as a Mantle-Slip Pole Shift! This type of shift is far more devastating than can possibly be imagined as it literally rips the planet apart, causing thousands of "Grand Canyons", tearing the earth down to the molten mantle, to be created worldwide in a matter of hours with thousands of magma eruptions causing ash to cover the atmosphere and entire planet. In this type of shift, the entire crust of the earth moves very quickly over the molten mantle below it at its weakest point which is the crust-mantle interface. "But as the days of Noah were, so shall also the coming of the Son of man be." (Matt 24:37). The Scriptures tell us that the earth will experience the same type of an event following the Lord's return, and most believe that His return is imminent. John describes this disastrous event for us in Revelation 6:12-17. There will be a great earthquake, sun becomes black as sackcloth, the moon becomes as blood, stars fall to the earth, the heaven departs as a scroll, every mountain and island moves out of their places, mighty men, bondmen, free men hide in dens and cry to the rocks and mountains to fall on them and hide them from the wrath of the

Vaccine Passports are a Dangerous Idea.

Vaccination has been presented as a way to return to pre-Covid times, but it has led to new government-imposed restrictions. The vaccine passport is described as a temporary measure. But Milton Friedman was right when he said, "nothing is so permanent as a temporary government program." The vaccine passport concept is similar to the Chinese social credit system that monitors an individual's behavior to permit or prohibit travel. (endtime.com 5/14)

Fauci Pushed for 'Gain-of-Function' Research in 2012, Said it Was Worth the Risk of Pandemic.

Dr. Anthony Fauci, the National Institute of Allergy and Infectious Diseases (NIAID) director and medical advisor to Presidents Trump and Biden, defended controversial "gain-of-function" research in 2012, and said the research was worth the risk of a pandemic. Fauci wrote in an article in the American Society for Microbiology in October 2012 which was first

reported by *The Australian*. "Scientists working in this field might say, as indeed I have said, that the benefits of such experiments and the resulting knowledge outweigh the risks." Dr. Fauci's recent admission that NIH sent \$600,000+ to the Wuhan Institute of Virology for research into the transmissibility of bat coronaviruses to humans. He has conceded that Covid-19 may not have been naturally occurring after insisting for over a year that it was. Some scientists who wanted this news kept under wraps threatened those who wanted it exposed. Gain-of-function research involves extracting natural virus samples from animals and engineering them to infect humans. It is like putting the virus "on steroids" to spread easier and faster from person to person. Gain-of-function research is not only controversial, but two years after Fauci defended it, President Obama's administration banned the practice on account of it being too dangerous.
