Rapture Ready?

Right now we stand on the threshold of eternity. Preparation time is short. "Search me, O God, and know my heart: try me, and know my thoughts: And see if *there be any wicked way in me, and lead me in the way everlasting.*"

Psalms 139:23-24

Increasing Numbers of Earth's Rivers and Lakes Are Drying Up.

According to *The Guardian* as of 2018 there are 19 rivers that were considered dry or at risk of drying up. This is a significant increase from five years ago when there were nine such rivers. Drying rivers is an environmental issue with major economic consequences. The **Indus River** which originates in the Himalayas and flows through Pakistan and India into the Arabian Sea has lost 50% of its water volume since the 1980s threatening the lives of millions of people and livestock. (netgalaxis.com 7/22). The 1,700 mile-long **Euphrates River** originates in Turkey, flows through Syria and Iraq, then joins the **Tigris River** and dumps into the Persian Gulf. The Euphrates is the main source of drinking water plus powers three hydroelectric plants providing electricity to 3,000,000 people in Syria. Two dams in northern Syria are in imminent danger of shutting down which would leave all those people without electricity. Both Christian and Muslim eschatology include prophecies of the drying up of the Euphrates signaling the end of days. (israelnews365 9/22) **The Yangtze River** in Asia is drying up at its banks and its bed is emerging in some areas. The **Rhine River** starts in the Swiss Alps, flows through Germany and The Netherlands and then flows all the way to the North Sea. It is a crucial channel for

National Leadership Changes

Britain's Leadership Vacuum.

Former finance minister Rishi Sunak completed a political comeback when he was selected prime minister by Britain's ruling Conservative Party just seven weeks after he was beaten to office by Liz Truss. Sunak, 42, takes the reins as prime minister during "one of the most turbulent eras in British political history" (*Reuters*, October 24, 2022). He will be Britain's first Hindu prime minister and the fifth British prime minister in six years, the third in less than two months. Britain's once strong and respected governmental system has become disdained by an increasing number of people. Britain, along with other Israelite-descended nations, will continue to see its reputation tarnished as it

drifts further away from the morality of the Bible. It will also increasingly lose the blessings God promised to Abraham.

Brazil's Bolsonaro Signals Cooperation With Transfer of Power.

Brazil's polls closed and elections concluded on Sunday as left-wing Luiz Inácio Lula Da Silva (known as Lula) became the country's next president, beating incumbent Jair Bolsonaro. Thousands of supporters of former President Bolsonaro gave Nazi salutes as they urged the Brazilian military to intervene and keep Bolsonaro in power after he lost the election on Wednesday. CNN reported that the Federal Prosecutor's office in Santa Catarina State said they will identify the people who gave the Nazi salute during the rallies and prosecute them. Punishment

could involve fines and imprisonment from 2 to 5 years. (msn.com 11/2, jpost.com 11/2)

International Congratulations Start Coming in for Netanyahu.

Likud leader Benjamin Netanyahu began to field congratulatory calls and tweets from Israel's foreign allies on Thursday after the release of the final results of the election showing he would likely be able to form a coalition and return to the Prime Minister's Office. (jpost.com 11/2) Even before coalition negotiations begin, some American Jews and politicians are predicting disaster for the US-Israel relationship. (prophecynewswatch.com 11/4)

"...till he knew that the most high God ruled in the kingdom of men, and *that* he appointeth over it whomsoever he will."

Daniel 5:21

Where Are We Headed?

'Where is the Promise of His Coming?' Media Mocks Christian End-Time Beliefs.

There is much chatter about the "end times" all over the Internet along with plenty of skeptics out there. There have been quite a few articles in the mainstream media that portray Christians that believe we are living in the "end times" as a bunch of nuts. The "end times" are here, and nothing will ever be the same again. So

rise up and become the person that God created you to be, because now is the time for the people of God to move forward in victory. (prophecynewswatch.com 11/5)

European Court Says Pre-tending to Abort Jesus was Exercising Freedom.

Overturning the verdict of a French court, the European Court of Human Rights ruled that a feminist who interrupted the rehearsal of Christmas carols to perform a

topless act of aborting Jesus on the altar of a Paris church was exercising "freedom of expression." (thekingiscoming.com 11/4)

Most Younger Americans Say There Is No 'Absolute Truth'.

Among young adults, we have now officially passed the tipping point. The majority of youth now say that each person determines their own version of truth. (prophecynewswatch.com 11/2)

European shipping, but right now, it's a nightmare to navigate. The **River Po** cuts across the top of Italy and flows east into the Adriatic Sea. It's fed by winter snow in the Alps and heavy rainfall in the spring. But now with the dry winter, spring and summer the Po is so dried up it is experiencing the worst drought in seven decades. **The Colorado River** is drying up at its banks and thinning out as a historic drought in the US West shows little sign of abating. (cnn.com 8/20) The mighty **Mississippi River** is one of the longest rivers in the world, and it's responsible for draining a huge portion of the US. But lately the river is drying up. Earlier this month, barges with shipping containers began idling along the

sandbars of the river that previously contained ample water. One barge can handle the load that would require 14 train cars or 70 semi trucks. The **Snake River** runs through the heart of the Pacific Northwest, from the mountains of Idaho all the way to the Columbia River in Washington. But now, it is drying up. Many, many other rivers, lakes, and reservoirs throughout the world have low water levels due to the world-wide drought and are in danger of drying up. (abc7.com 10/22) Wake up inhabitants of the world. Serve God and

If ye walk in my statutes, and keep my commandments, and do them; Then I will give you rain in due season, and the land shall yield her increase, and the trees of the field shall yield their fruit.

Dollar Dominance Scheduled for Termination as Saudi Arabia Embraces China.

The petrodollar is now on its last legs as Saudi Arabia has declared China to be its "reliable partner" for energy and trade. The US, has lost all credibility in the eyes of world leaders. Once the petrodollar is repudiated by nations around the world, the dollar will collapse in value as nations dump it, sending a flood of dollars back to the US where they will saturate the domestic economy. The result will be shocking price inflation in con-

Dollars and "Sense"

sumer goods (including food) followed by a suicide spiral of last-ditch money printing while the Fed buys up stocks, bonds, houses, and expiring Treasury debt, effectively leading to self-immolation of the dollar currency. (naturalnews.com 11/4)

Here We Go Again! The Fed announced on Wednesday that it was raising its benchmark federal funds target 75 basis points. This is the fourth straight hike of this size, making this by far the biggest streak of rate increases since the Fed began explicitly targeting the overnight interbank borrowing rate.

It brings the target up to a range of 3.75 percent and 4 percent, about where the effective fed-funds rate was back in January of 2008, (breitbart.com 11/3)

A Crippling Shortage of Diesel Fuel Threatens to Devastate Western Economies.

If we had no more diesel fuel, virtually all of our trains, trucks and ships would stop running. Needless to say, just about everything that stocks our store shelves comes to us via trains, trucks and ships. So the fact that there is not enough diesel fuel to go around is a really big deal. (prophecynewswatch

Technology

Revealed: The SynBio "Borgification" Infiltration of the Human Race.

A legal war is being fought right now to determine whether mRNA injections that alter human chromosomes confer intellectual property ownership rights of the organism to the corporation that invented the injection. Attorney Todd Callender is currently en-

gaged in this legal battle in an effort to secure the status of self-ownership of your own body, a principal from which the entire philosophy of freedom springs. (naturalnews.com 11/1)

"Technology Can Read Your Mind!". Throughout history, the thoughts in a person's head have been private unless revealed by the

individual. However, research from the University of Texas describes how a computer algorithm uses artificial intelligence and fMRI brain scans to decode a person's thoughts (The Scientist, October 20, 2022). Science continues to leap ahead, yet, as history has shown, these and other developments could be used for nefarious purposes. (twnews&prophecy.com 11/4)

America's Security

US National Security Train Wreck Over Rare Earth Minerals.

Bewildering environmental policies, energy plans detached from reality, and an incomprehensible practice of trusting China to provide critical components for both civilian and military technologies is an unsustainable trajectory. The administration has rejected fossil fuels, driving us commercially and across the defense industry toward electric vehicles. The problem is, China has a near-monopoly on the mining and refinement of rare earth minerals (such as lithium and cobalt) that are used in EV batteries. China also monopolizes the production of those same batteries. In short, America is being forced to tie its future to EVs while having no capability to provide key elements of the system. The rub here is that China is not a client we can order about. It isn't even our friend.

America's Woke Military Has Never Been

This Weak. For the first time the Heritage Foundation's index of American military strength has ranked

us as weak and very weak. The **Army** remains weak in capacity with only 62% of the force it should have. From 2005 to 2020, the **US Naval** fleet grew to 296 warships from 291, while China's navy grew to 360 from 216. The situation at the **Air Force** ranks very weak with munitions stockpile that would probably not support a fight that

lasted more than a few weeks. In addition, there are problems with pilot production and retention and a fleet of planes that continues to age. But the Army, Navy, and Air Force are woke, very focused on diversity and inclusion. (jihadwatch.com 10/31)

Terrorists Are Crossing Our Borders. Final fiscal year 2022 numbers show Border Patrol apprehended a whopping 98 watch-listed terrorists at the southern border, six times the record of 15 caught there in 2021 (three were caught in 2020 and none in 2019). That's also five times the number it took to carry out the 9/11 attacks that took America to war in overseas theaters for 20 years. (jihadwatch.com 11/1)
