

“Pray for the peace of Jerusalem: they shall prosper that love thee.”

There will be peace in Jerusalem when it becomes the city from which Jesus rules the earth. Just a little while and life, as we know it, will be changed forever. His Bride, taken out of the visible church, will suddenly be changed into immortal bodies and dwell in the presence of God. The short reign of antichrist on earth will be past, and Jesus with His Bride will come back to earth to destroy the wicked and set up His millennial reign on earth.

World Bank and Verizon Chiefs Say Digital ID Part of “Social Contract” Between Government And Citizens.

The list of supporters and promoters of the implementation of digital IDs, strongly criticized by privacy and security advocates, quite unsurprisingly includes the likes of the World Bank and Verizon. What is interesting is the way they are explaining the push, and also how they propose to make mass, worldwide adoption of digital IDs a reality. It is being called *digital transformation journey*.

Canada Following China's Path? Bank Accounts Linked To Obedience Scores.

The UN is unleashing its "Global Digital Compact" to create a global social credit scoring system for everyone eventually. Canada is implementing a new system called "open banking" that will link citizen's bank accounts to a new social credit scoring system. The Trudeau regime is radicalizing the nation's banking system to make it much

harder for citizens to express their voices against political corruption.

Proponents of the system say it will make Canadian banks more "inclusive," allowing them to easily access user data on demand while sharing information with one another. A World Bank partner called Open Banking Excellence (OBE), which originated in the UK, is proudly boasting right now that it will incorporate social credit scores with people's banking information in Canada. Canadians will likely receive digital "cash" and identification in a "convenient," all-in-one and "inclusive" place. Disturbingly, OBE already operates in some 40 different countries. The term "open society" is also disturbing being the ideology championed by international billionaire agitator George Soros. It implies open borders, no more prisons, and out-of-control crime without punishment, all of this substantiating "progressive" changes for the world.

Attacks on Christian Churches on the Rise in the US. the Family Research

Council (FRC) revealed a record-high number of church attacks in the year 2023, with 436 incidents ranging from arson and gun-related attacks, to vandalism and bomb threats. The 436 incidents in 2023 was more than double the amount in 2022, and over eight times as high as the number in 2018, which FRC points to as proof that the anti-Christian sentiment from the Left "is not only on the rise but also accelerating."

China Continues Crackdown on Christianity.

The level of control imposed on Christians by the Chinese government continues to increase, particularly on children. Religions in the country must have Chinese characteristics and adapt to socialist Chinese society. Beijing is most heavily reinforcing its religious restrictions on minors with the goal of ensuring that future generations are ideologically indoctrinated to listen to and follow the

Chinese Communist Party (CCP). The strategy the Chinese government employs to strictly control minors is called "The Pharaoh Policy." Just as Pharaoh targeted the Israelites' children in Exodus 1, Beijing's tactics highlight its determination to eliminate opportunities for young people to learn about God.

Where Is America As An Empire?

Seven steps in the life cycles of great powers

1. The age of pioneers.
2. The age of conquests.
3. The age of commerce.
4. The age of affluence.
5. The age of intellect.
6. The age of decadence.
7. The age of decline and collapse.

America is definitely in the final stages. During the middle stages, empires stop taking more land and start building walls instead. They switch from the offensive to the defensive. The growth of wealth and comfort clearly can undermine the values of character, such as self-sacrifice and discipline, that led to a given empire's creation. The heroes of an empire's people change over time as their values change. Soldiers, builders, pioneers and explorers are admired in the initial stages of the empire life cycle. Then successful businessmen and entrepreneurs are esteemed during the ages of commerce and affluence. During the last stages of decadence and decline, an empire's people often think most highly of and imitate athletes, musicians and actors, despite how corrupt these celebrities' private lives are. During the age of intellect, schools may produce skeptical intellectuals who oppose the values and religious beliefs of their empires' early leaders. What are some key signs of decline? 1. Rampant sexual immorality, an aversion to marriage in favor of "living together" and an increased divorce rate all combine to undermine family stability. 2. Many foreign immigrants settle in the empire's capital and major cities. 3. Both irresponsible pleasure-seeking and pessimism increase among the people and their leaders. 4. The government provides extensive welfare for the poor. The empire so affected by moral decline grows weaker and more vulnerable to destruction by forces arising inside or outside of it. . Communism Begins Where Atheism

Begins. If you wanted to attend worship service in 2020, government officials treated you like a terrorist.
