

The Endtimes Are Now!

News headlines related to biblical prophecies about the end times.

Keep Your Eyes on Jesus

Fret Not Thyself are the first three words in Psalm 37. Worry and fear do not mix with faith and trust. David further instructs us to TRUST in the Lord (verse 3), DELIGHT thyself in the Lord (verse 4), COMMIT thy way unto the Lord (verse 5), REST in the Lord (verse 7), CEASE from anger, and FORSAKE wrath (verse 8). In these dangerous and chaotic times we must keep our eyes fixed on Jesus. The world events, the natural disasters, the national elections, the wars that continue, the wide-spread antisemitism and the persecution of Christians, the threats of terrorism, the multitude of problems that appear to be out of control are all under the watchful eye of the Most High God. In Daniel 4:32, "...the most High ruleth in the kingdom of men, and giveth it to whomsoever he will." Rest in God's amazing love for His bride, soon to be snatched from this world to be with Him forever.

Compare Ancient Rome and Modern United States

Military Parallels: Ancient Rome and the Current State of the US Military.

When Publius Licinus Valerianus (known to history as Valerian) became emperor in 253 AD, the Roman Empire was in the midst of the 'Crisis of the Third Century', plagues, inflation, escalating conflicts, growing social tensions, rising crime, declining trade, and a struggling economy. But Valerian had decades of political experience, so everyone thought he would save the day. Instead, he continued bankrupting the treasury with huge deficits. He raised taxes, debased the currency (which caused inflation to soar), and demanded ideological conformity. Dissenters were arrested and severely punished, and many had their property confiscated by the state. The imperial borders

were also a mess; barbarian tribes were coming across the northern border in what was tantamount to a full-scale invasion of Roman territory, while the Sassanid Persians were invading Rome's Arabian provinces from the Empire's eastern border. Rome's once-legendary military was also shrinking; in fact, the Empire had a historic military recruitment crisis on its hands. Rome wasn't just unable to attract the best and brightest to its ranks; it was practically unable to recruit anyone at all.

The US in general is going through a similar period as Rome's 'Crisis of the Third Century', complete with political scandal and instability, inflation, massive deficits, border incursions, and even a pandemic. And the parallels between Rome's third century military and the state of the US military today are quite strong. Last year, the US military missed its recruitment goal by 41,000 troops, which is a staggering, record-high figure. The active-duty US military is now at its smallest size since 1940. As a result, mission readiness is down. Fitness standards are being abandoned. Recruiting bonuses have skyrocketed. Some politicians have even suggested offering citizenship to

illegal immigrants in exchange for serving in the US military. One of the biggest reasons for this recruitment crisis is that 77% of young people in America do not meet the basic standards, whether for physical, mental, or moral reasons. And that last one-- moral--is the fastest growing part: By the time students make it to university, they are filled with hate for their country; it's so palpable that the supreme leader of Iran, one of America's biggest enemies, recently praised American university students. Our mission readiness is down. Most major weapons systems, from fighter jets to naval warships, are rapidly becoming obsolete...yet there is no money to replace them.

Again, strong nations need both a robust economy AND a powerful military. We've written at length about America's future economic tsunami; the government itself forecasts the national debt to grow beyond \$55 trillion over the next decade. Social Security will run out of money in 9 years. The US dollar is on the road to losing its global reserve status soon. (prophecynewswatch.com 6/28)

Former Ambassador Ayalon: The Peace Process was a Mistake.

Former Ambassador to the US, Danny Ayalon, shared a candid reassessment from his involvement in the Israeli-Palestinian peace process of the 1990s and early 2000s, declaring the negotiations "a big mistake" and drawing parallels to the current debate surrounding the two-state solution. "We believe strongly that the land of Israel has always been the land of the Jews, and that Jerusalem is our capital, established by David thousands of years ago," Ayalon said. He explained that

while there had been many invaders and a two-thousand-year exile, the Jewish people had always maintained a presence and ultimately returned, fulfilling biblical prophecies. (israel365news.com 7/1)

Communists and Islamists Take France.

A movement aimed at destroying France will now be in a prime position to do so. The story of both the UK and French elections is down to liberal establishments allying with and empowering the worst Islamists and Communists to come to power. Macron, who had bet hard on the public rallying to him against

the National Rally and Marine Le Pen's conservatives, was crushed and decided to ally with the Communists and Jihadists represented by Jean-Luc Mélenchon and his France Unbowed party which is at the heart of the New Popular Front (NFP). (jihadwatch.com 7/9)

European Election Results Reveal the Accelerating Collapse of Western Civilization.

Shocking election results in France are compounding the leftward lurch of recent UK elections, revealing that Western Europe is a suicide cult of culture collapse. But so is the United States and all of western civilization. In today's *Brighteon Broadcast News*, I reveal why Christian-based western civilization has become too apathetic to survive, and why Islam-centric ethnic groups are conquering Europe. The Globalist One Health Agenda: Threats To Sovereignty &

Health Freedom. Where you live, where you can travel, what you buy, how you can spend your money, and what you can eat would all fall under this totalitarian biosecurity system that is being proposed. The term "One Health" was coined after the first SARS outbreak in the early 2000s to reflect the danger of new diseases emerging from human-animal contact. It refers to the idea of public health being not just about your health, but also about

Global Control on the Horizon?

animal and "planetary" health. It is framed in language designed to sound appealing and holistic. Embedded within it is the assumption that, because planetary health is at stake, there must be a global governing body with control over all plants, animals, and human beings to guard this "one health" and to "sustainably balance the health of people, animals, and ecosystems," with equity between prioritizing animals, the environment, and your personal health. The One Health concept has incredibly dangerous ramifications which should be apparent when you consider who is pushing it: the WHO, the World Bank, Bill Gates, the Rockefeller Foundation, the NIH,

the CDC, USDA, FDA, and every other Covid culprit you can think of. Consider the brainwashing of most doctors during Covid, and their refusal to recommend basic health supplements, sunshine, Vitamin D, or effective early treatment, instead leaving their patients at the mercy of remdesivir, ventilators, and mRNA shots. If you don't love the idea of cricket meal and vaccine lettuce prescriptions, this agenda should raise your eyebrows. It also raises the disturbing specter of healthcare being rationed or withheld on the grounds that your health needs are outweighed by environmental needs. (prophecynewswatch.com 7/6)
