APOSTOLIC FAITH CHURCH

# The Endtimes Are Now!

A time of remembering the many, many blessings as a result of our relationship with Jesus, our King! As the world rushes headlong towards the One World Religion, the One World Government, and The One World Leader, we have peace knowing the Church will be with Jesus while the world is in anguish and rage during the Tribulation.

## The “Christian” Church

### New Study Exposes Porn Use Among Christians.

The latest research from the Barna Group reveals 54% of self-identified practicing Christians admit to viewing porn, closely mirroring the 68% of non-Christians who do the same, and that 62% of Christian users feel comfortable with their porn habits, and only 14% express a desire to stop entirely, posing serious risks for the nominal church, where sexual sin goes unaddressed. Marital breakdown is the unseen cost of pornography with more than half of US divorces a result thereof. When a Christian couple commits to a life of marriage that reflects Christ's love, pornography can be a significant barrier. When these values clash, the consequences can be devastating, with partners experiencing betrayal trauma and trust erosion. Repeated exposure to pornography affects

the brain similarly to addictive substances like drugs or alcohol. Each viewing releases dopamine creating a sense of reward that reinforces the behavior. Over time, this desensitization process rewires the brain, making real-life intimacy less satisfying and increasing cravings for more extreme material. This cycle of addiction not only leads users to progressively disturbing content but also makes it increasingly difficult to stop. (prophecynews watch.com 11/5)

### Pope Francis Continues to Lead Catholics Away from the Faith.

During a three-day visit to Singapore, Pope Francis declared that “all religions are a path to God,” sparking backlash among religious leaders in the US. He stated that different religions are like “different languages” to reach God. “There’s only one

God, and each of us has a language to arrive at God. Some are Sheik, Muslim, Hindu, Christian, and they are different paths to God.” (thekingiscoming 11/8)

### Fifth Graders Forced to Recruit Kindergartners into Gender Ideology.

Two Christian families have filed a lawsuit against two teachers, a principal and the Encinitas Union School Board in California for requiring their fifth-grade sons to participate in classroom instruction aimed at kindergartners on the topic of gender ideology. The instruction was incorporated into the “Kinderbuddy” program, a mentorship program intended to foster healthy relationships between fifth-graders and kindergartners; no advance notification was offered, and parents had no chance to opt out their children. ## World Pandemic Fund

### US Pumps \$667 Million Into World Pandemic Fund.

The Pandemic Fund was established in 2022 by the member states of the G20. Its largest private contributor — at \$15 million — is the Bill & Melinda Gates Foundation, which also holds seats on the fund’s governing board. “The large sum of money given to the Pandemic Fund, coupled with calls for urgency, reveal the biopharmaceutical complex’s wishes for another global pandemic and further genetic injection deployments,” epidemiologist Dr. Nicolas Hulscher told The Defender. Dr. David Bell, a public health physician, biotech consultant, and senior scholar at the Brownstone Institute, said the involvement of private organizations like the Gates Foundation is incompatible with efforts to protect public health. “If public health institutions are primarily to serve the people, then private and for-profit interests could not have a role in directing them. This was obvious to anyone a few decades ago, but somehow has become forgotten as public health salaries are increasingly dependent on such entities.” Hulscher said the involvement of private entities like the Gates

Foundation, the Wellcome Trust, the Rockefeller Foundation, and the Coalition for Epidemic Preparedness Innovations (CEPI), “suggests that the Pandemic Fund will not serve our best interests.” Instead, the fund will “prioritize novel ‘vaccine’ development, including but not limited to, self-amplifying mRNA injections as evidenced by the 33 candidates in development,” Hulscher said. In 2021, CEPI, one of the “implementing entities” of the Pandemic Fund, along with Gavi, announced its “100 Days Mission” to build the capability to develop a vaccine for a future pandemic within 100 days. The Pharmaceutical Research and Manufacturers of America, an industry trade group, has also “signaled its support and intention to partner with the Pandemic Fund, including through future financial contributions.” “The burden of pandemics and outbreaks is grossly overstated, and the financing of the Pandemic Fund is grossly disproportionate to this,” Bell said. “The Fund is set up to manage an area of public health that will drive considerable profits for the pharmaceutical sector and its investors.” (childrenshealthdefense.org 11/6)

## **The Alarming Signals Pointing to a Potential Collapse of the US Dollar.**

As America's debt grows unchecked, the question isn't so much whether the US dollar will falter, but when. Seven key indicators signal trouble, painting a picture

that suggests the dollar's days as the world's primary currency may be numbered. The consequences of ignoring these signals could be catastrophic. **1) Federal Budget Deficits - A Debt-Fueled Spiral.** One of the clearest signs of economic instability is the massive federal budget deficit. The American government, it seems, has become so comfortable borrowing that repaying this debt is an afterthought. **2) The Ballooning Federal Debt .** Federal debt now stands at \$35 trillion, exceeding 123% of the nation's GDP, a staggering burden for any economy. **3) The Exploding Federal Interest Expense.** The cost of servicing America's debt is surpassing \$1 trillion annually, exceed-

ing all other expenditures, including national defense. **4) The Federal Funds Rate and the Struggle with Inflation.** In a desperate attempt to curb inflation in 2022, the Fed embarked on one of its steepest rate-hiking cycles in recent history, from near-zero rates to over 5% in just 18 months, causing the government's interest to explode. **5) Money Supply and Currency Debasing.** When money is created "out of thin air" to buy up government bonds, inflation inevitably follows, eroding purchasing power and widening inequality. **6) CPI as a Misleading Inflation Measure.** The Consumer Price Index (CPI), long relied upon as a measure of inflation, has come under fire as being misleading. **7) Gold Prices and the Flight to Stability.** Gold's enduring value is a testament to its role as a hedge against currency collapse. With record-high gold prices in recent years and central banks globally increasing their gold reserves, it's clear that confidence in fiat currency, including the US dollar, is eroding. None of these seven indicators on their own might signal imminent collapse. But together, they form a compelling case that the US dollar's stability is anything but secure. ## **Bill Gates Demands New 'One World Religion' to Accommodate AI.**

During a podcast, co-hosted by LinkedIn co-founder Reid Hoffman, Gates insisted humanity needs a new type of global religion to coincide with AI technology, suggesting that the current religions of the world will become obsolete. Gates wants us to all begin worshipping ma-

chines and reject God. Gates appears to suggest that transhumanism and new virtual worlds would be so alluring, that some sort spiritual authority would be needed for this shift. Gates is expecting, or hoping, that technology will make Christ obsolete, allowing elites to manufacture their own God. They don't want you to connect to a divine Creator they have no control over; they want you connect to their own creation. (disswire.com 11/1)

## **Most Americans Clueless of US Commitment to UN Global Governance Plan.**

On September 22, unnoticed by most Americans, the current US administration adopted the United Nations *Pact for the Future* to transform global governance, which introduces the foundations of a world government. There was no debate, no media coverage, no press releases. Americans were apparently not supposed to find out. (prophecynewswatch.com 11/5)
