| Introduction

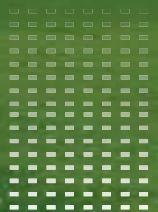

Sable Transport and Construction Limited is a leading provider of construction and manufacturing services in Zambia. Incorporated in 1980 as a private limited liability company, we are registered under the Laws of Zambia. The Sable Group is a well-established Zambian owned and managed company. Our mission is customer satisfaction attained through value-added services by creation of successful partnerships with our clients to effectively attain project goals.

Our deep commitment to foster growth and development in Zambia is demonstrated in our multiple lines of business with the government and private sector.

We strive to implement long term relationships with our clients based on a commitment to deliver products and services on time and within budget. To help fulfill this mission, each member of our senior management team is personally engaged in every project.

ABOUT US

>> Introduction

We dedicate all our in-house equipment and local resources to achieve project goals. Our pledge is to establish lasting relationships with our customers by working cooperatively, exceeding client expectations, and gaining trust through exceptional performance by every member of the Sable team. We value our employees, as they are our greatest resource. We treat our employees fairly and involve them directly in all our work processes to assure responsiveness and timely delivery of services.

The civil engineering line of business provides large scale road construction projects to include tar roads, feeder roads and bridges. We have in-house machinery to include heavy earth moving equipment such as graders, pavers, bulldozers, excavators, rollers, and compactors. The Kafue Sugar plant construction for example was all completed in-house by the Sable Group.

SABLE

TRANSPORT & CONSTRUCTION

CFL was incorporated in 1996 and ventured in sugar cane farming at Kafue. CFL prides itself as the only wholly Zambian owned and managed sugar producer in the country. CFL sugar is marketed under the brand of Kafue Sugar and enjoys an estimated 30% share of the sugar market in Zambia (2nd to Zambia Sugar with almost 70% of the market).

Our Kafue Sugar plant has a 3,500 Tons per day crushing and processing capacity. Today CFL has 7,000 hectares under cane and has grown to being the 2nd largest sugar producer in the country. The development of the Shibunyunji District at Kafue Flats is today largely dependent on Kafue Sugar.

CONSOLIDATED FARMING LIMITED

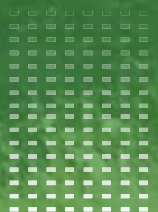

CONSERVATION

Preserving, protecting, maintaining and improving Zambia's natural resources and environment is critical for Zambia's infrastructure and development particularly with respect to land preservation. The Sable Group is actively engaged in producing carbon credits and is working with domestic and international partners and our local communities to promote sustainable agricultural use.

ENVIRONMENT

SAFETY

The Sable Group prioritises safety by ensuring that employees observe safety measures by wearing protective equipment and adhering to safety protocols. We work with relevant government authorities to routinely assess safety measures at our manufacturing plant at Kafue as well as our construction facilities around the country. Safety certifications are required for employees working in all our facilities.

SAFETY, HEALTH & WELLNESS

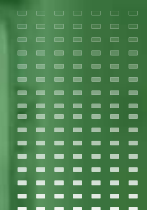

TRAINING

Our work require that Sable Group employees have relevant training and certification for key jobs such as engineering, human resource management, employee counselling, sensitivity training such as adherence to anti-discrimination laws and practices as well as fair labour practices.
