

# THE FUTURE OF TECH WELLNESS IS HERE.

## Massage Reinvented™

Our percussive therapy devices are scientifically calibrated to reach deep into your muscles and stimulate heat and blood flow, helping to bring oxygen in and flush toxins out, essentially hydrating your muscles back to health. Percussive therapy works 60% deeper than consumer-grade vibration massagers by using our unique combination of depth, speed, and force.

All our new 4th generation devices come with our proprietary brushless motor using QuietForce Technology™ making them quieter than ever.

Depth:

**16mm  
Amplitude**

Our 16mm amplitude allows our Theragun devices to treat deep within the muscle to release tension.

Speed:

**2400ppm  
Frequency**

Our 2400 percussion per minute (40 per second) speed allows our devices to override the pain signals to your brain, making the treatment experience more comfortable than manual muscle therapy.

No-stall force:

**60lbs  
of Torque**

Our devices can withstand up to an additional 60 pounds of applied pressure—without stalling—for deep treatment to the areas that need it.

# THE THERAGUN TOOL BOX

Each of our attachments is designed to treat specific areas of your body comfortably and they work with all 4th generation devices.

## Dampener

Used mostly for tender or bony areas. Perfect for overall use.

## Standard Ball

Perfect for overall use on large and small muscle groups.

## Thumb

Used mostly for trigger points and the lower back.

## Cone

Used mostly for pinpoint muscle treatment, including the hands and feet.

## Wedge

Perfect for shoulder blades and IT bands and commonly used for “scraping” and “flushing”.

## Supersoft™

Theragun's version of vibration therapy and mostly used for sensitive areas, including bones.

## Duo Adapter

Used in combination with two attachments to deliver twice the treatment, twice as fast.

\* Attachments sold separately

All attachments are made with non-porous closed-cell foam which are easy to clean with disinfecting wipes.

Not including the Supersoft attachment
