

# Helping families thrive.

## Do you have questions or concerns about your child?

- Sleep
- Basic milestones
- Social skills
- Tantrums
- Language development
- Behavior
- ADHD
- Autism Spectrum Disorder

## Cognoa can help

Cognoa is a trusted resource for those caring for children between 1 and 8 years old. Our developmental screening and expert advice helps children reach their full potential and supports parents with common challenges.

## Why Cognoa?

### Clinical Assessment

Our developmental assessment is the fastest way to get reliable answers about your child's development every step of the way (up to age 8).

### Personalized Recommendations

Based on your child's unique needs, we offer customized, research-based activities you can do at home with your child to help them hit their milestones.

### Expert Advice

Ask Cognoa offers expert answers to questions from parents like you on everything from eating and potty training to sleep and restless behavior.

### Early Intervention

Our clinically-validated assessment can identify signs of developmental delay, including autism, as early as 18 months. Research has shown that early intervention can create lifelong gains for your child.

### Private & Secure

What you share is private, never shared with your employer, and treated as protected health information.
