In-Home Travel Fee	$150	$150	One Time Travel/Set Up Fee. Scan sessions can be back to back.
QRS-PEMF Session	$20	$20	On Site (1) 24 minute PEMF Session
QRS PEMF Session Package	$180	$170	On Site (10) 24 Minute PEMF Sessions
Normatec Compression Therapy	$15	$15	On Site (1) 15 minute Normatec Compression Sessions
Normatec Compression Therapy Package	$100	$90	On Site (10) 15 minute Normatec Compression Sessions
PEMF/Normatec Combo	$30	$30	On Site (1) PEMF/Normatec Compression Session
PEMF/Normatec Combo Package	$280	$270	On Site (10) PEMF/Normatec Compression Sessions
NeuroStimulation Therapy	$110	$100	**In Home**/On Site (1) NeuroStimulation Therapy Session
NeuroStimulation Therapy Package	$1000	$980	**In Home**/On Site (10) NeuroStimulation Therapy Sessions
Sensitiv Imago Wellness Scan	$400	$370	On Site (1) Wellness Scan
Sensitiv Imago Package 1	$1900	$1750	On Site (5) Wellness Scans
Sensitiv Audit Package 2	$3800	$3500	On Site (10) Wellness Scans plus (5) PEMF Sessions
Kinesiotherapy	Pricing available on site		

**For sessions that require deposit cash rate will be the (total - $100 deposit)

Sensitiv Audit/Sensitiv Imago

The Sensitiv Audit/Imago are highly sophisticated, state-of-the-art bio-resonance machines, with proven 96% accuracy. The Sensitiv Audit/Imago will provide you information in regards to WHAT IS HIDDEN IN THE BODY. The Sensitiv Audit/Imago uses non-invasive frequency to investigate the body for any ailments that may exist. These technologies are able to detect pathogens, environmental pollutants, heavy metals, toxins, viruses as well as determine sensitivities to foods, chemicals, GMO's, electromagnetic radiation and much more. The scan will provide you with pin point accuracy in regards to where INFLAMMATION and further damage is occurring in the body. It will list current medical ailments and will outline a detailed procedure of how to get to optimal wellness. Once a detailed scan is produced of your internal organs, tissues and cells, therapy can be provided. Therapy is provided in the form of BRT (bio-resonance therapy)*** and/or MO-RA therapy***. Supplements can also be created and tested with the device when needed. Dietary recommendations will be given based on blood type as well as current state of gut health. One scan with the Sensitiv Audit/Imago can be as effective as 20-30 different specialist visits, as every organ and system in your body can be investigated for proper function, pathogen and toxin accumulation, while you sit comfortably.

Bio-resonance is a therapy that uses electromagnetic frequencies to detect pathologies, bacteria, viruses and parasites as well as toxins and other harmful substances. It can be used to reliably detect food intolerances, allergies of all kinds, to help with detoxification and is incredibly potent for treatments of addiction (to stop smoking, for alcohol abuse etc.) Sensitiv Audit/Imago combine the latest technologies with incredible accuracy (up to 96%) and efficiency of treatment, making it to one of the leading devices of energy medicine worldwide. Bio-resonance is the medicine of the future, being non invasive, fast and has the ability to detect changes on a cellular level very early on, before major pathological changes had a chance to develop – making it into an excellent preventative tool. Bio-resonance works on the principle that every living cell emits a healthy frequency- which can be detected. If disease processes evolve the vibrational output changes, which can again be measured. Bio-resonance is a kind of energy medicine (electro acupuncture or homeopathy are in the same rubric) or form of

vibrational healing, which goes back several decades. The scientist Dr. Royal Rife discovered that pathogens (virus/bacteria) emit a certain unique frequency, and can be destroyed by exposure to a specific (inverted) frequency, without any negative effect for the body.

*** MORA therapy is used for eliminating and discharging pathogenic accumulation, it is used to promote the release of toxins/pathogens which can initiates specific healing processes. MORA-Therapy is free from side effects. It is in no way stressful for the patient and therefore specifically suitable for use with sick children and immune compromised individuals. The application possibilities are extremely versatile because virtually any organic or functional, acute or chronic, already existing as well as a nascent disease or disorder, can be treated with MORA therapy.

Wellness Disclaimer

Frequency therapy is intended to support general health, recovery, and wellness. It is not intended to diagnose, treat, cure, or prevent any disease. Individual results may vary, and anyone with certain medical conditions should consult a qualified healthcare professional before using frequency therapy.

QRS PEMF (Pulsed Electro-Magnetic Frequency) Therapy

QRS PEMF Therapy (Quantum Resonance System Pulsed Electromagnetic Field Therapy) is a non-invasive wellness technology that delivers gentle, low-frequency pulsed electromagnetic fields designed to support the body's natural biological processes. The QRS mat is intended to promote relaxation, enhance circulation, support cellular function, and encourage the body's natural recovery mechanisms. Many users incorporate QRS PEMF therapy into their wellness routine to help manage everyday stress, improve sleep quality, support healthy energy levels, and promote overall well-being.

Research on PEMF therapy suggests it may support healthy circulation, muscle recovery, temporary relief of minor aches and discomfort, relaxation, and tissue repair. Some individuals also report improvements in recovery following physical activity, reduced muscle tension, enhanced relaxation, and a greater sense of balance. The QRS system is designed to deliver low-intensity electromagnetic frequencies that mimic naturally occurring frequencies found in the Earth's magnetic field, helping create an environment that supports the body's normal regenerative and self-regulating functions.

As part of a comprehensive wellness program, QRS PEMF therapy can complement healthy nutrition, regular exercise, stress management, and other wellness modalities to help optimize overall health, vitality, and quality of life. While many people experience positive wellness benefits, results vary from person to person, and QRS PEMF therapy is not intended to diagnose, treat, cure, or prevent any disease. It should be viewed as a supportive tool for enhancing overall wellness and maintaining a healthy lifestyle.

Potential Benefits of QRS PEMF Therapy

- Supports the body's natural cellular function
- Promotes healthy circulation and blood flow
- Encourages relaxation and stress reduction
- May improve sleep quality and restorative rest
- Supports the body's natural recovery processes
- Helps reduce muscle tension and stiffness
- May provide temporary relief from minor aches and discomfort
- Supports healthy joint mobility and flexibility
- Promotes healthy energy production at the cellular level
- Encourages balanced nervous system function
- Supports healthy oxygen and nutrient delivery throughout the body
- May help reduce the effects of everyday physical stress
- Supports post-exercise recovery and muscle performance
- Promotes healthy inflammatory balance as part of normal body function

- Encourages overall physical relaxation
- Supports healthy tissue repair and regeneration
- May enhance overall vitality and well-being
- Supports the body's natural detoxification processes by promoting healthy circulation
- Helps maintain optimal cellular communication
- Supports healthy immune system function as part of overall wellness
- May improve mental clarity and focus through relaxation and improved rest
- Promotes a greater sense of balance and overall wellness
- Complements other wellness therapies and healthy lifestyle practices
- Non-invasive, comfortable, and easy to incorporate into a wellness routine

Common Reasons People Use QRS PEMF Therapy

- General wellness optimization
- Stress management
- Sleep support
- Athletic recovery
- Muscle recovery
- Relaxation
- Healthy aging
- Joint and mobility support
- Energy and vitality support
- Recovery from everyday physical demands

Wellness Disclaimer

PEMF therapy is intended to support general health, recovery, and wellness. It is not intended to diagnose, treat, cure, or prevent any disease. Individual results may vary, and anyone with certain medical conditions should consult a qualified healthcare professional before using PEMF therapy.

Normatec Hip and Leg Compression Therapy

Wellness Benefits of Normatec Compression Leg & Hip Therapy

Normatec® Compression Therapy uses dynamic air compression to deliver a relaxing massage that helps support circulation, recovery, and overall wellness. By applying sequential compression to the legs and hips, the system promotes the body's natural recovery processes and helps reduce feelings of fatigue after daily activities or exercise.

Potential Wellness Benefits

- Supports healthy circulation and blood flow
- Encourages lymphatic drainage and fluid movement
- Helps reduce muscle soreness and stiffness
- Promotes faster recovery after exercise or physical activity
- Helps relieve feelings of tired, heavy legs

- Supports healthy joint mobility and flexibility
- Encourages relaxation and stress relief
- May help reduce temporary swelling associated with everyday activities
- Supports healthy muscle recovery
- Enhances oxygen and nutrient delivery to muscles
- Helps flush metabolic waste products from tissues
- Promotes healthy tissue recovery
- Supports overall lower-body comfort
- May improve flexibility following activity
- Helps reduce muscle tightness
- Encourages recovery between workouts
- Supports an active and healthy lifestyle
- Complements physical therapy, chiropractic care, and wellness programs
- Comfortable, non-invasive, and customizable treatment

Common Reasons People Use Normatec Therapy

- Athletic recovery
- Exercise performance and recovery
- Standing or sitting for extended periods
- Travel recovery
- Muscle fatigue
- Leg discomfort after activity
- General wellness and relaxation

- Healthy circulation support
- Post-workout recovery
- Active aging and mobility support

How It Works

Normatec uses **patented Pulse Technology** with overlapping air chambers that inflate and deflate in a precise sequence. This mimics the body's natural muscle pump to gently move fluid through the legs and hips, helping support circulation, reduce muscle fatigue, and promote relaxation without invasive procedures.

Wellness Disclaimer

Compression Therapy is intended to support general health, recovery, and wellness. It is not intended to diagnose, treat, cure, or prevent any disease. Individual results may vary, and anyone with certain medical conditions should consult a qualified healthcare professional before using compression therapy.

Neurostimulation

Wellness Benefits of Neurostimulation Therapy

Neurostimulation therapy delivers low-level electrical impulses through electrodes placed on the skin. These gentle impulses activate nerves and muscles, encouraging healthy muscle contractions, supporting circulation, and promoting the body's natural recovery mechanisms. Treatments are comfortable, non-invasive, and customized to each individual's wellness goals

Potential Physical Wellness Benefits

- Supports healthy nerve and muscle communication
- Promotes muscle relaxation and reduces tension
- Helps relieve temporary muscle soreness and discomfort
- Supports healthy circulation and oxygen delivery
- Encourages the body's natural healing and recovery processes
- Helps reduce muscle fatigue after exercise or daily activities
- Supports healthy joint mobility and flexibility
- Encourages normal muscle activation and coordination
- Supports healthy posture and muscle balance
- Promotes tissue recovery following physical activity
- May assist in reducing stiffness and improving range of motion
- Supports athletic recovery and performance
- Complements rehabilitation and injury recovery programs
- Supports recovery from strains, sprains, overuse, and soft tissue injuries
- Helps maintain strength and muscle conditioning during recovery
- Complements chiropractic care, massage therapy, PEMF, and compression therapy

Potential Emotional & Psychological Wellness Benefits

- Promotes deep relaxation and a sense of calm
- Helps reduce the physical effects of everyday stress
- Supports a balanced nervous system
- Encourages mental relaxation and emotional well-being

- May improve sleep quality by promoting relaxation
- Supports improved mood and an overall sense of wellness
- May help reduce feelings of tension and mental fatigue
- Encourages mindfulness and stress resilience
- Supports cognitive clarity by helping the body relax
- Promotes a greater sense of balance between mind and body

Injury Recovery Support

As part of a personalized recovery plan, neurostimulation therapy may help support the body's natural healing process by:

- Encouraging healthy circulation to injured tissues
- Supporting muscle re-education following injury
- Helping maintain muscle function during periods of limited activity
- Reducing muscle guarding and protective muscle spasms
- Supporting flexibility during rehabilitation
- Promoting comfort during the recovery process
- Assisting with post-workout and post-activity recovery
- Supporting recovery after orthopedic procedures when appropriate and recommended by a healthcare provider

Common Reasons People Choose Neurostimulation Therapy

- Athletic recovery and performance
- Muscle soreness and stiffness
- Recovery from physical injuries
- General muscle conditioning
- Stress management

- Relaxation and improved sleep
- Healthy circulation support
- Active aging and mobility
- Wellness optimization
- Supporting an active lifestyle .

Wellness Disclaimer

Neurostimulation therapy is intended to support general health, recovery, and wellness. It is not intended to diagnose, treat, cure, or prevent any disease or mental health condition. Individual results may vary, and it should be used as part of a comprehensive wellness program under the guidance of a qualified healthcare professional when appropriate.

Kinesiotherapy

Wellness Benefits of Kinesiotherapy

Kinesiotherapy is a movement-based wellness therapy that uses guided exercise, stretching, and therapeutic movement techniques to support the body's natural ability to improve strength, mobility, flexibility, and overall function. By promoting healthy movement patterns and muscular balance, kinesiotherapy can help enhance physical performance, encourage recovery, and support long-term wellness. It is often incorporated into personalized wellness and rehabilitation programs to improve quality of life and maintain an active lifestyle.
Kinesiotherapy uses individualized therapeutic exercises, stretching techniques, balance training, and functional movement exercises tailored to each person's needs and goals. By encouraging proper movement mechanics and strengthening the body's support systems, the

therapy helps improve mobility, coordination, and overall physical function while supporting the body's natural healing and recovery processes.

Potential Wellness Benefits

- Supports healthy movement and mobility
- Improves flexibility and range of motion
- Promotes muscle strength and endurance
- Encourages proper posture and body alignment
- Supports joint stability and function
- Enhances balance and coordination
- Helps reduce muscle stiffness and tension
- Supports healthy circulation
- Encourages the body's natural recovery processes
- Promotes healthy muscle activation and coordination
- Supports functional movement for daily activities
- Improves overall physical performance
- Helps maintain mobility as part of healthy aging
- Encourages better body awareness and movement mechanics
- Supports overall physical resilience
- Complements chiropractic, massage, PEMF, neurostimulation, and compression therapies

Injury Recovery Support

Kinesiotherapy is commonly used to support recovery by promoting safe, controlled movement that encourages the body's natural healing process. As part of a personalized recovery program, it may:

- Help restore mobility following injury
- Support recovery from muscle strains and sprains
- Improve flexibility after periods of inactivity
- Help rebuild strength following injury or surgery
- Reduce muscle tightness and joint stiffness
- Support healthy tissue healing through movement
- Improve stability and reduce the risk of future injuries
- Enhance coordination and functional movement patterns
- Encourage a gradual return to normal daily activities
- Support recovery from sports and overuse injuries

Emotional & Mental Wellness Benefits

Physical movement has a powerful impact on overall well-being. Kinesiotherapy may help:

- Promote relaxation and reduce physical stress
- Support emotional well-being through regular movement
- Encourage the release of endorphins that support a positive mood
- Improve confidence through increased strength and mobility
- Help reduce feelings of fatigue
- Support better sleep quality
- Encourage mental clarity and focus
- Promote a greater sense of independence and overall quality of life
- Support resilience during recovery and rehabilitation

Common Reasons People Choose Kinesiotherapy

- Improve flexibility and mobility
- Increase strength and endurance
- Recover from injuries
- Reduce muscle stiffness
- Improve posture and balance
- Support healthy aging
- Enhance athletic performance
- Recover after surgery
- Maintain an active lifestyle
- Support long-term wellness and physical function

Wellness Disclaimer

Kinesiotherapy is intended to support general health, mobility, recovery, and overall wellness. It is not intended to diagnose, treat, cure, or prevent any disease. Individual results may vary, and exercises should be performed under the guidance of a qualified healthcare or wellness professional when appropriate.
