Idelain. 2008-07 D.identifier.uri DC.Dscript.bidroc Ormo 3. Analysis. The study was conducted by a school in Shakhan and preparing for the city in Lucy, while these schools were selected during smuggling. These studies were also represented by methods of quality research and context (wallet). In addition, 80 students in all classes were selected in all classes and were created to provide evidence. In addition, there are only 2 classes of teachers, and both were accepted and represented. In addition, in this study, 2005 and 2008. A.L.I collected materials for data collection, such as interviews, interviews, documents, documents, 11 and four years of exams. The collected data was analyzed by the number, and oral data were presented. The discoveries of this study show that many students use the choice, grammar, creating a good sentence, creating ideas, organize ideas and use a punctuation system at the moment when they need. It is clear that many students have less low skills for organizing and writing. Except,B'javaScript is disabled in your browser. Some features of this website may not work if you do not use it.
