

We now offer...

a better rapid drug testing program

US PAT 10,340,032

At **Medi Check Direct...** *...we take drug testing seriously!*

That is why we invested in a state-of-the-art rapid drug testing system by Labb. This technology sets us apart from many other testing facilities and provides a level of reliability far above traditional rapid drug testing kits.

What this means is, your rapid drug test results are digitally generated, independently verified, and automatically transmitted to your email inbox before your donors even leaves our facility.

We believe that everyone deserves the best possible rapid drug test result and we use Labb technology to deliver it to you.

*Labb stores all rapid testing images along with logs, donor signature and testing data for at least 5-years from the original testing date.

Medi Check Direct rapid drug testing results are...

FAST & RELIABLE RECORDS

Accuracy comes from reading a rapid test properly & reliability comes from being able to prove it.

Your rapid drug test results will be independently verified & an image will be stored for 5-years in the event one of your results is ever challenged.

DIGITALLY LINKED & PAPERLESS

Mistakes can easily happen when collectors use hand written forms with manual testing processes.

Your donor records are digitally linked to their specimen containers, delivering precise testing instructions to the the reader & any confirming laboratory.

Result Guard protected: Your results include anti-tamper technology that improves reliability & can help prevent fraud.

PROTECTED & SECURE

Protecting drug testing results is protecting confidential, medical, & personal information.

Your drug test results are protected behind an encrypted library that is simple for your to access, yet protected from unauthorized viewing.

Note: The authentication required to view Labb results transmitted via email is as simple as entering a one-time user name & password.

Confidential Drug Test Result Form

This form combines custody control details with donor specimen results and contains PII and may be governed by HIPAA and/or other federal, state and local regulations. To verify the validity of this result form, download the certified copy by scanning the QR code to the right using any smartphone or tablet computer and entering the unlock password displayed.
