

Over 30 handy ways to use your CrocMagnet™ in this Guide

Trademark & Patent Pending

Designed to keep your fingers clean and away from surfaces that might carry germs and disease, use in areas where you get a high volume of people coming in to contact with the same surfaces. PLUS over 30 other handy uses it's the perfect Gift for yourself, your friends or family, and it's ready to go on your Keyring when you need it.

www.CrocMagnet.com

Safely Touch Potential Germ Covered Surfaces

Push Button at Pedestrian Crossings

Safely open doors

Safely press Elevator Buttons (especially in Hospitals)

Turn Pages in Books, Magazines and Newspapers. No more licking your fingers to turn pages.

More Public Surfaces that may carry germs or disease

Antimicrobial what does that mean?

The Crocmagnet is made from food grade **Antimicrobial** Silicon Rubber that is **FDA Approved**

(U.S Federal Drug Administration).

Antimicrobial is defined in the British Dictionary as “Capable of destroying or inhibiting the growth of disease-causing microbes”.

Due to its resiliency, non-porous surface and sustainability, food grade silicone is kinda like the Superman of silicones.

The CrocMagnet was designed to give you an extra layer of protection when touching common surfaces that might be hiding dangerous bacteria and germs, by removing direct contact with your fingers.

Did you know ? A recent study (see article below) found we touch our face 23 times per/hour, which is one of the main ways we catch and spread disease.

Wash or rinse your CrocMagnet regularly, specially after touching public surfaces, the Antimicrobial Silicone outer shell allows you to easily clean the unit under warm to hot soapy water to remove any microbes (Careful when using Hot Water).

Whilst the CrocMagnet is Antimicrobial and therefor resistant to disease forming microbes, it may still hold bacteria and other Disease like Covid on its surface, so good practice is to place your hands and fingers on the side with the ‘Croc head’ image (so lets call this the clean side) and use the reverse side (we will call this Dirty side) to Press, Grab or Hold surfaces. Washing the unit regularly under warm soapy water specially after touching surfaces is required.

Step 6 Finish

Removing CrocMagnet

IMPORTANT
Please comply with any State Laws regarding the safe use of your Cell / Mobile Phone whilst operating a vehicle.

More Handy Uses

Hands Free Video Chat

Simply attach your CrocMagnet to your mobile using the supplied metal mounting plate, then place it on your fridge (works with all Metal fridges) because the CrocMagnet features a 2-way magnet it holds both the mobile phone and the fridge at the same time.

Store your Eyewear, sunglasses on fridge with keys

Your keys will always be right where you left them, on the fridge.

Cooking in Kitchen - Keep your Utensils Close At Hand and off the bench, freeing up more space to prepare. Attach to the metal face of the rangehood.

Cooking outside on the BBQ / Grill - attach utensils to the lip of the lid/hood, this gives you more space for food or plates on the bench.

More Handy Uses

open cans or tins with pull rings.
handy if you dont want to wreck your
nails, or have arthritis.

Tip: Pushing down the inside of the tab with
your thumb will slightly raise the rear of the ring
tab, allowing you to slide your CrocMagnet
much easier under the ring.

Slide under pull ring.

Lift Up to open

More Handy Uses

Going for a Surf or a run outdoors, simply hide your keys on your car, no more carrying heavy keys around.

Tip: The CrocMagnet is non-reflective rubber and will blend into the underside of the vehicle easily. A great hiding spot is behind the tyres on the shock absorbers. (See images below)

locate a suitable metal surface like wheel springs or car frame that is hidden from view

Place your CrocMagnet making sure for a good connection, and keys are out of sight.

Working on or under your car, store tools within easy reach on any part of the metal chassis

Find Body Filler on car - handy when Purchasing a car to check if it has been in an accident. Magnet will only stick to metal areas.

More Handy Uses

Great Shot! - Capture a video of your favourite Golf swing, simply setup your mobile and press record on your device and capture the shot.

Store a metal flash light in an easy to find location, no special bracket needed, just a metal surface, or corner wall with metal bracing.

School Locker - Teenagers Safely Store their Mobile / Cell Phones. Use on all metal lockers (can be used on plastic lockers that have metal screws or other metal components inside)

Hold Party or Festive decorations in place without using screws or nails. Use metal corner braces or metal light fitting to hold the ends of your decoration or balloons in place. CrocMagnet can be hidden behind decoration, not hidden here so you can see it in action.

More Handy Uses

Stop losing Your TV Remote, Store it on TV or Walls

Find wall studs by locating the metal nails or screws used to fix the plaster wall sheets to the timber studs.

Sewing Needles and pins have a habit of finding their way to dangerous locations like your kitchen or couch.

Keep them together in plain sight.

Hold Fishing Hooks

More Handy Uses

Counting Cash - Stop! DON'T LICK YOUR FINGERS, the silicon rubber on the CrocMagnet does a way better and SAFER job.

Hint: Using 2 CrocMagnets you can hold the notes together at one end and count at the other.

Pen Holder on Fridge using any metal parts of the pen

Safely store your Scissors on Fridge

Hold/support Screw Drivers stable, perfect when your hands are shaky.

More Handy Uses

Hold Paint brush on Paint Can.
Holds brush on can whilst you climb a ladder, you can secure the paintbrush to the guttering, freeing up your hands, having an extra hand free when you are climbing a ladder is very important for safety.

Paint is easily washed off the CrocMagnet.

Mobile Phone Mounting Plate

Metal Mounting Plate for mobile phone

The metal mounting plate is used to attach your CrocMagnet to your mobile/cell.

Easy Attachment - Using 3M the worlds best tape manufacturer for over 100 years since 1902

Installation Steps

1. Clean and dust and grime from the back of your phone. Make sure the surface of your phone back is dry and smooth.
2. Peel the 3M sticker from the back of the metal plate and stick the metal plate onto the surface of your phone, adhere with finger or hand pressure on it for at least 20 seconds.
3. We suggest you wait for 24 hours before using to make sure the metal plate sticks firmly onto your phone back.

If you want to remove it, you can use a hair dryer blowing hot wind on it to melt the adhesive first and a business card or credit card to pry it off.

0.5mm Ultra Thin Metal Mounting Plate

Strong enough to hold your phone and thin enough not to be noticed.

IMPORTANT Stick plate direct to back of mobile phone itself for the best connection, if using a mobile cover that is thicker than 1mm then stick the metal plate on the outside of the cover.

Other Uses

Hold items like wet clothes or string line on your caravan (using outside metal walls of van) a great way to hang wet clothes easily.

Place CrocMagnet on your mobile then connect to metal basketball ring or football goals and press record and tape your best shot.

Place CrocMagnet over car door lock on vehicle door to stop it from freezing over.

Hold Photos, Bills or important doc's on your fridge

Help get Batteries out of Devices

TikTok set record on your mobile and tape your dance moves, whilst CrocMagnet holds your mobile phone on floor or on a metal surface.

Hairdresser's - trying to hold both your cutting scissors and thinning scissors, now you can have both close at hand within easy access.

Hold securely your Plans to the Bonnet of your vehicle when working outdoors (4 CrocMagnets, one for each corner would generate a secure fit in windy conditions)

Many people have already found new handy uses for their CrocMagnet that are not included in this guide.

Magnet Safety

Magnet Disclaimer Safety

Powerful attraction forces can cause injury

Neodymium magnets are more powerful than other kinds of magnets. The incredibly powerful force between magnets can often be surprising to those unfamiliar with their strength.

Neodymium magnets are not for children

Neodymium magnets are not toys.

Children should not be allowed to handle neodymium magnets. Small magnets can pose a choking hazard. If multiple magnets are swallowed, they can attach to one another through intestinal walls. This can cause severe health risk, requiring immediate emergency surgery if correctly diagnosed. **IMPORTANT The CrocMagnet fully encloses the magnet in a sealed Silicon Rubber outer shell making it more safe and less likely to be swallowed.**

Neodymium magnets can affect pacemakers

The strong magnetic fields near a neodymium magnet can affect pacemakers, ICDs and other implanted medical devices. Many of these devices are designed to deactivate in a magnetic field. Care must be taken to avoid inadvertently deactivating such Neodymium devices.

Magnets can affect magnetic media

The strong magnetic fields near neodymium magnets can damage magnetic media such as floppy disks, ID cards. They can also damage televisions, computer monitors and CRT displays. Avoid placing neodymium magnets near electronic appliances

Neodymium magnets can become demagnetized at high temperatures

While operating temperatures are often listed as 176 degrees fahrenheit, the actual maximum operating temperature of a magnet can vary with the grade, magnet shape and how the magnet is used.

Neodymium magnet powder or dust is flammable

Avoid drilling or machining neodymium magnets. When ground into a dust or powder, this material is highly flammable.

Strong magnetic fields can interfere with compasses and navigation

Strong Magnetic fields can influence internal compasses of smartphone and GPS devices. However the small magnet the CrocMagnet uses has not caused any issues on any testing. Mobile phones currently use internal magnets to run many features from determining if the phone is open on flip phones, in speakers, and some other functions. **If you notice any problems please discontinue using your Crocmagnet on your mobile device.**

Neodymium magnets can corrode

In normal operation Neodymium magnets can rust or corrode in the presence of moisture, **however the CrocMagnet encloses the Magnet in a Silicon Rubber outer shell that protects the Magnet from outside elements.**
