**CERTIFICATE VALID FROM:**

**Aug 03, 2017 To Aug 02, 2018**

**AUDIT SCOPE:**

The Ranch of Pond-O-Gold is situated on Ty Ty Omega road, Tifton, Georgia. It is 30 acres in extent and is planted to conventional seedless and seeded watermelons. It is irrigated by overhead pivot, water supplied for a pond that has tested well within the parameters for generic E.coli. Inorganic fertilizer was applied before planting and additional inorganic fertilizers applications were based on plant demand. Planting took place on 3/20/2017, with seedless established at 1,650 per acre plus pollinizers at 1:3 seedless. The first harvest commenced on 6/6/2017, with the final harvest on 6/30/2017. All crop protection products are EPA registered for application on the target crop in the USA. The farmer has complied with the recommended label quantities and the PHIs, for the applied products. The field has a No Trespass notice posted and workers are trained to be on the look out for suspicious activity. Clean portable toilets and hand wash stations are provided and these have appropriate GAP signs, referring to hand washing before returning to work. Adjoining land is all farmland and the risks are considered controllable. There were no field workers at the Ranch at the time of the audit inspection.

**PRODUCTS:**

**PRODUCT(S) OBSERVED DURING AUDIT**

Watermelons
