CERTIFICATE VALID FROM:

Jul 10, 2018 To Jul 09, 2019

AUDIT SCOPE:

The audit included a growing area of approximately 30 acres, the well that supplied water for irrigation and foliar applications, adjacent lands, spray application equipment, sanitary facilities and the associated food safety file system. The conventional watermelon crop was grown using plastic mulch and a drip irrigation system that was also used to inject liquid fertilizer. The growing area was surrounded by land that is used in a rotation of grazing and cropping. Cattle had been grazed on the growing area until their removal 14 months before harvesting began. At the time of the audit, harvesting was under way, but was slowed by muddy conditions caused by recent heavy rainfall.

PRODUCTS:

PRODUCT(S) OBSERVED DURING AUDIT

Watermelons
