AUDIT SCOPE:

Watermelons are brought to the packing shed in tractor-drawn wagons, from which they are unloaded onto a conveyor belt. As they travel along the conveyor, they are graded then placed into cardboard bulk bins. Filled bins are tagged with traceability information, then placed in the staging area from which they are loaded onto shipping trucks. There was no washing or brushing step during the audit. The facility encompasses approximately 5000 sq ft with a single packing line with 16 employees. The building is open sided on the north, east and south sides. The audit included the facility, surrounding grounds, water source, sanitary facilities, pest control devices and the associated food safety file system. The facility has performed a HACCP analysis. There are no critical control points. All hazards are controlled by GMPs.
