

## 18 July 2025: New Webship Experience is Coming this August

Your shipping experience with InXpress Webship is about to get even better! **This August**, we're launching **Webship Freight** - a powerful add-on to your existing Webship booking platform for pallets and bulky freight shipping with **15 additional transport providers**, giving you more flexibility & control over your freight needs.

### Here's what you can look forward to:

- More Carrier Options for pallets and bulky freight - enjoy a wider range of domestic freight solutions to suit your shipping requirements
- Seamless Access - Your current Webship login details will remain the same. You'll notice a **toggle button at the top of your dashboard** - simply click to explore the new platform

**No action is required from you.** Your account will be upgraded automatically, and we're here to support you every step of the way.

### Are you an existing MACHSHIP user?

- **NO** - starting August, 15 new carriers will be available to you in Webship!
- **YES, I am currently using Machship manually** - once Webship Freight is live, your separate Machship login will be switched-off & you can conveniently start using your current Webship account to access the same carriers that you would use in Machship.
- **YES, I am using Machship through integration** - nothing is required from you. There will be no change in your ways of booking shipments.

If you have any questions or would like a quick walk-through of the new features, feel free to reach out to your freight consultant and account manager.

Thank you for choosing InXpress - we're excited to continue growing with you!
