

24 April 2026: U.S. Consumer Product Safety Commission eFiling requirements going live July 8, 2026

We want to make sure you are aware of an upcoming change that may affect your shipments to the U.S. Effective July 8, 2026, eFiling will be mandatory for imported products regulated by the U.S. Consumer Product Safety Commission (CPSC).

Importers of CPSC regulated products will be required to provide all data elements necessary for the customs broker to complete the CPSC Participating Government Agency (PGA) message set at the time of entry into the US. The full CPSC PGA message set will require importers to provide additional data elements for each product imported.

To streamline the process, importers may pre-file information about the product in CPSC's Product Registry, allowing the broker to transmit an abbreviated CPSC message set.

Recent reports indicate that completion of the CPSC Product Registry process may take some time, so importers who are interested are encouraged to begin the process as soon as possible to avoid potential clearance delays. Start the CPSC Product Registry process now.

We will share more information regarding implementation details as it becomes available to help you stay informed and support you along your shipping journey with FedEx.

To assist you in understanding the commodities that are regulated under the CPSC requirements, please see the attached material referenced in the website announcement, including CPSC Guidance and HTS List for the Electronic Filing (eFiling) of Certificates of Compliance.
