25 July 2025: Webship Freight Early Access

You would have received our email last week regarding an upcoming feature in Webship called **Webship Freight**.

Webship Freight is an add-on to your existing Webship access that would let you use over 10 additional transport providers for **bulky & pallet freight**, with just one single click of a button.

The add-on has been extensively tested & we are ready to enable it to customers that wish to try it before its official launch on **11th August 2025**.

If you wish to gain early access to Webship Freight, please reach out to your Dedicated Freight Consultant or Account Manager & we will enable the new add-on to your account. Thank you!

Are you an existing MACHSHIP user?

- **NO** - starting August, 15 new carriers will be available to you in Webship!
- **YES, I am currently using Machship <u>manually</u>** - once Webship Freight is live, your separate Machship login will be switched-off & you can conveniently start using your current Webship account to access the same carriers that you would use in Machship.
- **YES, I am using Machship through <u>integration</u>** - nothing is required from you. There will be no change in your ways of booking shipments.
