www.inspiringsalons.co.uk

Nailstations with Filter Technology

Extraction equipment to provide clean air for salon customers and staff.

The GVS Nail Station provides a fresher, cleaner and more hygienic environment for clients and technicians with its unique 4-way extraction system.

The specially developed air filters remove dust and odours and retain them safely within the pre filter and Combination Carbon/HEPA filter. The GVS Nail Station is available in a range of colours and styles, all featuring the adjustable light with integrated extraction, variable speed fan, multistage filtration and storage draws with extraction that prevent odours escaping. These features all ensure that your customers and salon team are fully protected from the dangers of long term exposure to fumes within the workplace.

All Nailstations are available in a choice of left or right hand.
