

A breakthrough beyond the surface

BIOJUVE uses the power of probiotics to truly bring your skin back to life. The effects are unlike any traditional skincare routines, revitalizing and optimizing the ideal ecosystem for skin health.

The age-defying X-factor is our proprietary Xycrobe™ Technology — a patented true skin probiotic specifically designed to restore balance to your microbiome for beautiful results.

LIVING BIOME ESSENTIALS DUO

BIOJUVE®

Discover the age-defying power
of a true skin probiotic

Restore the microbiome. Revive your skin.

F5BV089.03

Boosted and balanced

Do more than mask the signs of aging. Go deeper to restore and revive the real foundation of healthier, younger-looking skin — a thriving microbiome.

Genetics, stress, environment, age, pathogens and more can create an imbalance in the skin's natural microbiome. BIOJUVE® is **complete skin biome** care that restores your skin to its full potential.

More than a skincare routine

BIOJUVE is a skin biome care revolution, transforming the very nature of what your skin truly needs. Our patented technology goes beyond the surface to balance the skin's microbiome, while naturally producing **antioxidants, proteins, polypeptides, fatty acids** and more 24/7.

Clinical study results show a significant improvement in the appearance of:

- Redness
- Dryness
- Texture
- Tone
- Fine lines
- Wrinkles
- Photodamage
- Undereye puffiness and dark circles
- Tightening

Clinical trial participants agree:*

90%

"My skin feels healthier"

89%

"Makes my skin feel younger-looking"

*Data on file. Results may vary.
Patient satisfaction is from 8 weeks of treatment.
