September 2, 2010

To Whom It May Concern:

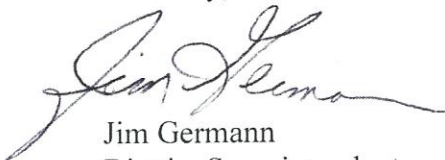

I have no reservations in recommending B and B Builders of Sidney for any project. In the summer of 2009, B&B installed new windows, fascia, and soffits at Dawson County High School. The contractor was flexible and helped us plan the project and offered several suggestions that improved it immensely.

Due to the Quickstart grants, the school was under time constraints to have the project completed by September 30. B&B doubled their crews and worked on the project consistently to meet the deadline. Once the project was completed and funds were still available, they were available to replace the fascia and soffits even though that was not part of the original plan.

The projects cost came in as expected without surprise add-ons. When the contractor discovered that insulation was missing on the second floor, he brought this to my attention so it could be rectified immediately. Also, during the project, it was discovered that several rafters in the gym ceiling were split from previous roof material. B&B was able to send an additional crew to fix the rafters in time for the fall sports.

In the future, Glendive Schools and Dawson County High School would like to work with B&B Builders whenever possible. They are considerate to the school operation and are pleasant to all staff and students. If you have any questions, feel free to contact me.

Sincerely,

Jim Germann
District Superintendent
