Consent for Treatment

I, _____, agree to proceed with treatment by Philip Borgardt, MD. I understand that Dr. Borgardt has a strictly consultative practice. To this end, I understand that to remain a patient in this practice, I must agree to accept the responsibility to obtain and keep current a relationship with a primary care physician or gynecologist to provide routine physical examination and evaluation services. Documentation of such treatment will be requested as indicated.

In addition, I understand that many of the treatment protocols and medications that are recommended by Dr. Borgardt in the course of my care may be characterized as alternative in nature, outside the "standard of care," or off FDA label for a specific indication. I understand that each such incidence will be discussed with me fully at the time of our visit, so that I may have full benefit of comprehensive informed consent.

Potential risks, benefits and the limitations of current research on any particular treatment option will be discussed with me at length. I understand I have the right to decline treatment at any time and that I can request review of the informed consent process as needed. I understand that it is impossible to predict all risks/outcomes when dealing with new therapies and agree to assume these risks.

I also agree to abide by Dr. Borgardt's recommendations for follow up appointments, as they are often determined by clinical protocols and the need for careful monitoring when dealing with newer therapies.

Acknowledgement of Receipt of Notice of Privacy Practices

I hereby acknowledge that I can receive a copy of Dr. Borgardt's Notice of Privacy Practices. I further acknowledge that a copy of the current notice is available from the receptionist and that a copy of any amended Notice of Privacy Practices will be available at each appointment.

Authorization to Release Medical Information / Records

I hereby request that Dr. Borgardt has authorization to request any records and/or information necessary to complete treatment on my behalf. I also authorize Dr. Borgardt to provide in writing to my doctor, hospital, a report of my diagnosis, treatment, prognosis and recommendations, as well as other data pertinent to this treatment of me. This authorization will remain valid until revoked in writing by myself.

Authorization for Records Request

I hereby authorize the release of my medical records to:

BIO-IDENTICAL HORMONE REPLACEMENT THERAPY INFORMED CONSENT

I understand that natural or bio-identical hormone replacement therapy (BHRT) is the therapeutic use of hormones identical to the hormones made naturally by the body. These hormones are typically used to treat symptoms of premenstrual syndrome (PMS), pre-menopause, peri-menopause, menopause, post-menopause, andropause (male menopause), thyroid dysfunction and adrenal fatigue. Other symptoms and health concerns may also be treated with BHRT.

I understand that it is my responsibility to have an annual physical examination, annual gynecological exam/breast exam/mammogram or equivalent (for males, i.e. prostate exam), including any suggested laboratory tests to ensure that I have no disease(s) which might make natural BHRT inappropriate for my condition.

I also understand that BHRT requires laboratory monitoring as prescribed by my physician or healthcare provider. I understand that bio-identical estrogen potentially has the same cancer risk as the estrogen produced within my own body and should never be used without bio-identical progesterone, unless a hysterectomy has been performed. Personal family history of breast, ovarian, or endometrial (uterine) cancer should be discussed with your healthcare provider. For male patients, studies have shown testosterone does not increase risk of prostate cancer. A large majority of Testosterone Replacement Therapy studies show improved heart health, and decreased risk of heart attack.

I understand that BHRT does not increase heart disease if given at the proper dosage and ratio. Patients with previous deep vein thrombosis (DVT), or blood clots, require careful monitoring if they are taking oral estrogen. Women or men with known heart disease or other serious illness need routine evaluation and annual labs including cholesterol levels, EKG, and other necessary tests. Patients are encouraged to follow up with their primary care physician for these conditions. BHRT taken transdermally (through the skin) does not increase risks of blood clots or DVT.

I hereby release Philip Borgardt, MD., FACP, his associates, and TNC Inc. Weight Loss from any and all liability associated or connected with my consultation, recommendations, and/or use of BHRT. I hereby state that I am aware of the potential benefits and side effects associated with BHRT.

I understand that no doctor, nurse, dispensary, or administrative personal can guarantee that BHRT, even if prescribed, will provide the results I desire. I understand that lifestyle modifications, proper nutrition and supplementation, adequate sleep, and stress reduction are all key components to a successful BHRT regimen.
