

HC – 02

Proposed rule changes for the shoot year 2022 concerning shooter assisting machinery, devices, equipment, and electronics. Add to the "Contestant" section on pages 13 of the 2021 – 2022 Official P.I.T.A. Rule Book.

- (F) During a registered event it is illegal to utilize any shooter assisting machinery, device, equipment or electronics that could distract the other shooters on the squad. No "DEVICE" can be placed on the ground in front or near the shooter. If the "DEVICE" is on the shooters body or shotgun it is required to be "READY FOR OPERATION" to maintain the timing of the squad. Practice type of "DEVICES" should be limited to the practice trap. A person standing directly behind and within a few feet of a contestant during a registered event is also prohibited.

Reason for proposed change:

1. Addresses TV Type training aids.
2. Addresses coaching during registered events.
3. Eliminates squad timing delay causes.
