

HC - 03

Proposed rule change for the shoot year 2022 concerning sub gauge tubes in a 12-gauge shotgun. Add to the "Contestant" section on pages 13 of the 2021-2022 Official P.I.T.A. Rule Book.

(G) During a registered event involving a Sub-Gauge Tube inserted into a 12-gauge shotgun that has two barrels the contestant may not possess any 12-gauge shells on his person. DISQUALIFICATION of all event targets could apply. (Does not apply if both 12-gauge barrels have Sub- Gauge Tubes installed).

Reason for proposed change:

1. Eliminate possibility of shooting Sub-Gauge targets with a 12Gauge shell(s).
2. Would not apply if both barrels are tubed for Sub-Gauge.
3. Provides management with defined rules.
