# *Mission Statement*

Generation Global is a project founded by a group of international high school students, dedicated to capturing diverse perspective of the adolescent experience in the early 2020s, an era dominated by the polarizing effect of global political tensions, gripping social issues, and scientific innovation, all under the context of a global pandemic.

Join us every two weeks for an episode of Generation Global, where we will invite you to listen in to the factual, reliable information on pressing topics, as well as the sincere observations of young people all around the world on these topics.

Welcome to Generation Global.
