

Leitech COMBI Gages

Size & Depth Control

For Threaded & Cylindrical Holes

Leitech COMBI Gages deliver a functional **SIZE check** and a direct numerical **DEPTH** reading in a single operation—whether you're measuring precision threads or reamed cylindrical bores.

Standard

The Production Workhorse.

The Standard COMBI features a telescoping sleeve with **0.5 mm / 0.025" resolution** for fast, reliable depth control. It is the definitive streamlined solution for high-volume production floors and lab environments.

Hi-Resolution

Precision in Tight Spaces.

For tighter tolerances, the Hi-Resolution COMBI offers **0.1 mm / 0.005" resolution** and a unique locking device to freeze readings. It is the perfect choice for inspecting holes in dark, confined, or difficult-to-access areas.

Digital

Instant Clarity & Documentation.

The Digi-COMBI provides an ultra-precise **0.01 mm / 0.0005" LCD readout** with an instant inch/metric toggle. Built for modern shops, it features **RS232 output** for direct, error-free integration into your SPC data systems.

Digital Motorized

The Ultimate in Consistency.

The DMG-COMBI eliminates operator variability with a motorized handle that ensures standardized torque for every measurement. Ideal for **high-volume automation**, it supports maximum throughput with variable speeds and **wireless data transmission**.
