ABC Recruitment - Expert in IT, Sales en Digital Carrières

Over ABC Recruitment: ABC Recruitment staat bekend om zijn expertise in het verbinden van getalenteerde professionals met toonaangevende rollen in IT, sales en digitale domeinen. We werken nauw samen met innovatieve bedrijven die actief zijn in diverse sectoren zoals elektronica, medisch onderzoek, hernieuwbare energie, voedselproductie en infrastructuur. Onze missie is om vooruitstrevende organisaties te voorzien van topkandidaten die met de nieuwste technologieën en duurzame innovaties aan de slag gaan. Ben je klaar om jouw carrière een impuls te geven in een dynamische en toekomstgerichte omgeving? Sluit je dan aan bij ons en onze klanten op de reis naar een betere toekomst.

For our IT team in Tienen, we are looking for an IT Functional Analyst.

Your function

- You analyze the functional needs and challenges of the business users based on the company's business processes.
- You make feasibility studies and translate the needs of the end users in functional requirements as a basis for an optimal IT & Digital solution.
- You propose the best and most efficient solutions and validate their completeness, quality and compliancy.
- You liaise with business stakeholders, IT colleagues and IT suppliers to understand the functional and technical aspects of the solutions, their strengths, weaknesses, capabilities and potential improvements.
- You identify and address functional Applications & Data requirements while selecting or building the best solutions with the end users in mind.
- You create Use Cases to test and validate the quality and correctness of the implemented solutions.
- You create and maintain technical and functional documentation.

IT Functional Analyst

Tienen

- You deal with development requests for the adaptation of existing applications and for the development of new Applications & Data architecture.

Your profile

- You have a Bachelor in Computer Science or a related field (or equivalent by experience).
- You have proven experience in IT Applications & Data services in a global environment, preferably in Belgium and France (5+ years).
- You are able to support an Application & Data architecture and to translate the view and the needs of different stakeholders (both business and IT).
- You have experience in working with internal resources and external suppliers/partners.
- Your approach is “down to earth”, pragmatic and analytical.
- You have a good generic insight in the IT Applications & Data services and solutions, trends and suppliers.
- You have knowledge of and experience in Microsoft solutions, Methodologies (e.g. Project Mgmt, Agile, ...).
- You have excellent communication skills, both written and spoken, and are able to communicate in English, French and Dutch. Additional languages are a plus.
- Business experience in the Agricultural and Industrial working environments is a plus.
- You are open to occasional travel to other locations.

We kijken uit naar jouw sollicitatie! info@abc-recruitment.be
