- Enjoy working with SCRUM as a development process
- Taking part in all development related activities such as design, implementation, manual and automatic testing, troubleshooting, and bug fixing.
- Creating great software that lasts and takes pride in your work.
- Debating design choices and sharing your knowledge with others around different Technologies incl. Sales Force/MS Dynamics, Camunda, Angular, Yii2,

**What do you need?**

- Be an experienced system developer working with high demands on availability and performance in different languages like;
  - o PHP
  - o Python
  - o Angular (TypeScript, JavaScript, HTML)
- Knowledge around Micro services and related structures
- Write code that is well tested, understandable, maintainable, and not make you (or anybody else) ashamed six months from writing it

- Have a good overview and keep yourself updated with the available frameworks, tools, and patterns that help you succeed in your work
- Good knowledge of English (Dutch or French is a plus)
- Basic knowledge of networking, TCP/IP, VLAN
- Relevant experience within a Analyst/Developer role
- A positive attitude and pride for you work

**Offer for you:**

- An environment where everything is possible and where growth and development are at the core;
- An attractive salary with fringe benefits;
- A great atmosphere with a well-deserved pat on the back now and then... as it should be!

· **Our CORE values distinguish us from other employers:**

- o Commitment: we go for it together and strive for a long-term relationship
- o Ownership: taking and accepting responsibilities
- o Respect: every person is different, and we let everyone be themselves
- o Empowerment: we offer you all the help, support and tools you can think of
