FIONA RETURNS

This time as a workshop

This discussion is about the importance of soil, pruning and plant selection to prevent the devastation that storms bring to the Island. Bring your paper, pencils and questions. There will be several presentations and a roundtable discussion.

- Tree species wood density
- Tree species/ Cultivar structure
- Tree positioning/ wind tunnelling.
- Tree Species susceptibility to pests.
- Tree positioning: Open standing? Within a tree stand.
- Root structure at time of planting.
- Staking/Guy-wiring new Trees
- Soil type/soil depth/soil life/soil fertility.
- Soil moisture content, deep water table verses shallow.
