## Past Performance Feedback

(Actual survey verbatims available)

“Thomas does a fantastic job of listening, processing, and providing feedback. He does an even better job of reaffirming your points of view and encouraging you. I walk away each time feeling like I am ready for so much more that I was unsure of previously.”

“Thomas set the right environment from the beginning of the session. His energy (especially in a virtual environment) was much appreciated. He was knowledgeable and guided the discussion over the 2 days in a very thoughtful manner, allowing space in the broader team to share. The session was very engaged and provided for candid discussion.”

“Thomas, thanks so much for your expertise, encouragement, and belief in me that I am a leader. You’ve unlocked so much for me – thank you!”

“You did a great job leading the class! You hit just the right balance of pushing us to go deeper on this journey, while making sure everyone felt comfortable to share a wide variety of perspectives. I also appreciated that you encouraged us to think about bias in so many ways, not just around race, gender, etc. I felt encouraged to do more as a leader and gained some ideas and potential allies to deal with a situation that is personally affecting me.”
