ABCrosby & Company, Inc.

Other than the metal and pine table bases, all products offered by ABCrosby are made in the USA.

260 Years of New England Quality and Value

ABCrosby & Company, Inc. brings more than 260 years of New England quality and value to the custom furniture industry.

Starting with Jesse Crosby, Sr. in the 1750's, the Crosby family have been building high quality workboats for local Cape Cod fisherman and yachts for wealthy sailors up and down the east coast of the U.S. Andrew Crosby grew up around the boatyards and learned the family values of delivering high quality customer-unique products with high quality customer care. He brings these values to the contract furniture industry.

Our products, which range from industrial work tops to restaurant table tops, table bases and chairs to 3 complete line of contract furniture, feature quality New England craftsmanship and are aesthetically pleasing as well as highly functional.

We build to your design.... Our products are designed to be highly customizable. Moreover, we can manufacture your unique designs in the quantities you need when you need them. Never settle for standard.

We are your custom furniture manufacturer.

Our Manufacturing Capabilities

You are looking for furniture that is unique to you - furniture designed to enhance your facility and built to last. ABCrosby manufactures high quality products built to your specifications when you need them. We have the equipment, processes, and skilled craftsmanship to deliver the high-quality design you demand on time and on budget. We have the capacity and flexibility to manufacture both high volume and low volume orders and offer competitive pricing with expedited delivery for time-sensitive projects. Whether we are simply cutting panels to size, gluing up veneer or laminate sheets, delivering ready-to-assemble components or complete furniture sets, we deliver your design. Call us for a quote or to discuss your needs.

In manufacturing your furniture, we work with a wide range of materials including

	<p style="text-align: center;">Laminated Products</p> <p>We specialize in manufacturing high pressure laminate products edged with laminate, wood, T-Mold, or PVC tape. We can work with your preferred laminate as well as specialty materials including sheet metal, rubber sheets, and vinyl on a variety of core materials such as particle board, MDF, plywood, and metal.</p>	
<p style="text-align: center;">Solid Wood Products</p> <p>We produce solid wood plank and butcher-block tops in your specified sizes, shapes, and wood species. We only use preferred select lumber to give you the high-quality tops you demand. We stain the wood to match your desired color and finish with two coats of conversion varnish.</p>		<p style="text-align: center;">Wood Veneer Products</p> <p>We manufacture wood veneer products in a variety of sizes, shapes, wood species and grades to meet your needs. Our standard tabletops are made using Maple or Red Oak veneers, but we also make tops using Ash, White Oak or other veneers.</p>
	<p style="text-align: center;">Particle Board, MDF & Plywood</p> <p>ABCrosby & Company produces table tops and panel components in variety of sizes and shapes to meet your specifications using particle board, MDF, Melamine or plywood. In addition to manufacturing finished panels, we also offer panel glue-up, edge-banding and cut-to-size services.</p>	
<p style="text-align: center;">Solid Surface Products</p> <p>ABCrosby is an experienced solid surface fabricator. We produce work bench tops, table tops and other products using Corian® and other solid surface materials.</p>		<p style="text-align: center;">Furniture Components</p> <p>ABCrosby manufactures high quality laminate and wood components for other manufacturers, fabricators, builders and other companies. Whether you need panels to be glued up or cut to size for you to finish or if you need ready-to-assemble components, we can produce the components you need for your project.</p>

You are looking for high quality solid wood table tops. Table tops built to last, built to fit in your facility and to your special requirements,

ABCrosby manufactures solid wood plank table tops in a variety of sizes, shapes, and wood species. Our standard solid wood tables are made of White Ash, but we also build tops using Maple, Red Oak, White Oak, Cherry, and other species. Tell us what wood species you want for your tops and we will make it for you.

We use Preferred Select lumber for our solid wood products – unless you want us to use wood with knot and other features for that special rustic look - to give you the highest quality hardwood table tops possible. Each plank in the top is one piece; we never glue shorter pieces together, which can cause the table to split as the table expands and contracts

Our standard wood table tops are 1¼” and 1¾” thick tops. Our solid wood table tops are cleated on the bottom for dimensional stability.

Standard solid wood tops are stained with one of our standard stains and finished with two coats of conversion varnish. Are you looking for a non-standard color? We are experts at matching your desired color.

ABCrosby also builds custom solid wood table tops, including butcher block and rustic table tops, to meet your requirements. Booth tops with radius corners are also an option on most of our edge styles.

Talk to us about your custom solid wood table top requirements.

You love wood but do not feel that solid wood tables meet your needs. You want a more exotic, more expensive species or you want grain with more intricate patterns and decorative overlays. Perhaps you feel solid wood is too expensive or are concerned about the long-term stability of wood in your facility. Or perhaps you want an eco-friendlier product with the wood look you want. You want veneer tops.

ABCrosby manufactures veneer wood table tops in variety of sizes, shapes, and wood species to meet your specifications. Our standard veneer tops are 1/4" thick and made with Maple or Red Oak veneer with a particle board core.

ABCrosby builds veneer tops to your specifications. Custom sizes, veneer species, edge styles, stains and shapes including booth style tops and radius corners are available by quotation. We can also manufacture these tops using MDF, plywood or other core material.

Our standard edges for our veneer tops are our A (Veneer Self Edge) and F (1/2 wide wood) edges. We also manufacture veneer tops with our other edge styles as well as your custom edge design. Please refer to page 6 to see some of our other edge styles.

Our standard veneer tops are stained with one of our standard stains and finished with two coats of conversion varnish.

You are looking for a different look – maybe wood style or a stone look or a color or pattern that fits your facility’s design. You want a cost-effective, easily maintained table top. You want laminate tops.

ABCrosby & Company specializes in manufacturing high pressure laminate table tops - self edged or edged with wood or t-mold. Our table and counter tops are the highest quality and durable tops on the market.

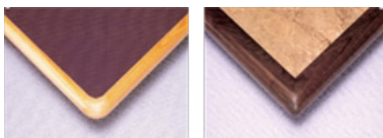

We offer laminates in hundreds of colors and patterns. Our standard laminates are standard priced Formica, Nevamar and WilsonArt laminates but we can work with any manufacturer’s high-pressure laminates.

Our standard laminate tops are 1¼” thickness. Our tops can be manufactured as self-edged or edged with t-mold or solid wood. Our standard wood edges are made with Ash and other wood species are available with a custom quote. The wood edges stained to your specifications and finished with a highly durable conversion varnish.

Looking for something different? Talk to us. Custom sizes, shapes, laminates, edge styles, wood species and stains are available with a quote.

Custom stain matches are available upon request. There may be an additional charge for custom stains. Booth tops with radius corners are an option on most of our edge styles. Please contact us to request a quote.

More on Our Expandable Laminate Table Tops

Our standard 1-1/4" thick expandable laminate table tops are constructed using long wearing, extremely heavy-duty spring-loaded flip hinges. They are further reinforced with strap hinges to eliminate leaf flex. When in the retracted position the leaves are secured with friction catches. Expandable tables are available in the standard A, B, F, G, H, J, and N edge styles. Other edge styles are available by quotation. Tables with two drop leaves, opening to rectangles instead of rounds, are also available by quotation. Expandable Table with picture frame edge (Style G) on a turned pedestal base, shown in an open and closed position

Expandable Table with picture frame edge (Style G) on a turned pedestal base, shown in an open and closed position

Laminate Selection

ABCrosby can work with any high-pressure laminate offered by any vendor. Our standard table top prices are based on the cost of the standard-priced Formica, Nevamar or WilsonArt laminates. Standard priced laminates include the following finishes from these three manufacturers.

- Formica** www.formica.com/ Standard Finishes: 58 (Matte), 43 (Artisan), SP (Sculpted), MC (Microdot)
- Nevamar** www.Nevamar.com/ Standard Finish: T (Textured)
- WilsonArt** www.wilsonart.com/ Standard Finishes: 60 (Matte); 38 (Fine Velvet Texture)

We also work with other laminates when specified by our customers including premium priced laminates from Formica, Nevamar and WilsonArt. Request a quote if you wish to use non-standard laminates.

Some of these non-standard laminates include:

You like laminate but are looking for table tops with drip edges or grooves or some design feature that cannot be manufactured with our standard laminate construction. Or perhaps you are looking for table tops sealed from the outside environment. Thermofoil tops may be the answer to your requirements,

ABCrosby offers our customers high quality Thermofoil table tops. Choose from a variety of beautiful colors, wood grains and textures. Select from 6 standard colors or upgrade your table top and select from 19 optional colors to get that high-end look you want in your facility without the high-end price. We can quote other colors as well. Let us know what you are looking for!

Our Thermofoil tops are constructed using

- 1-1/8" MDF Core
- White Melamine Backer
- 100% Seamless RFT
- Standard edge profile with eased bottom edge

Thermofoil tops are moisture-resistant, easy-to-clean, and low-maintenance.

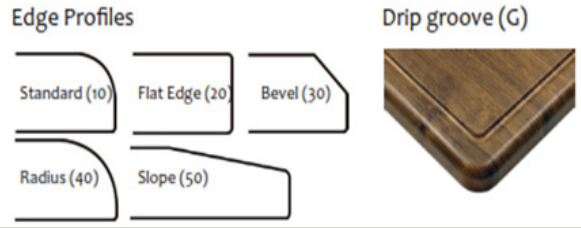

What is RTF? 3D Laminates (also known as "rigid thermofoils" or RTFs) are thermoformed decorative surfaces produced in an array of solid and metallic colors, wood grains and abstract patterns and finishes. These thermofoils can be formed around contoured edges and corners giving the appearance of solid wood or various solid surfaces. RTF components offer flexibility to design tables, wall panels, furniture, fixtures and cabinetry in various shapes that are edge seamless.

Contact us to learn more about our Thermofoil Tops!

Don't see your color?
Talk to us!
We will work with you to find the right color.

Solid Wood, Veneer, Laminate, Thermofoil – all beautiful and the options are almost limitless. But you cover your table tops with table cloths. You want a high-quality, highly durable, cost effective top. Oh also – you want easy maintenance and cleaning – PLUS you want a top, which will help create a quiet and fine dining experience for your customers. You want padded tops.

ABCrosby manufactures 1-1/4” thick, white vinyl padded table tops for your restaurant, bar or lounge. Our padded tops are available in both standard and custom sizes including expandable tops. We manufacture our padded tops with high quality padded vinyl covering a particle board top. The particle board is sealed top and bottom with backer paper to ensure the long term stability of the top.

Our vinyl padded table tops are especially made for heavy commercial use and are easy to clean and maintain.

We can also provide different material and colors for our padded tops. Please request a quote for your custom padded tops.

Note: Due to width of the vinyl padding, the maximum width for padded tops is 48"

You want a very durable, very easy to clean, stain resistant top. You want the look of stone or quartz without the price tag. You want a top which will last a very long time. Solid surface tops may be your solution.

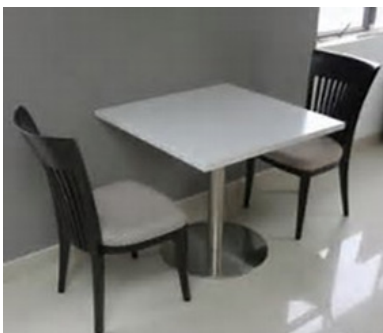

ABCrosby manufactures solid surface table tops using DuPont CORIAN® and other solid surface materials including Avonite, WilsonArt, and Formica brands.

We manufacture our tops with particle board core to bring the thickness of the table to 1-1/4" thick and to secure the top to the base. The tops are edged with the solid surface material to cover the particle board.

These tops are ideal for any food service, hospitality or other project where durability, beauty and longevity are valued. These table tops will enhance your facility.

Solid surface tops are nonporous and stain resistant. Spills do not permeate the surface. With proper cleaning, solid surface table tops do not promote the growth of mold, mildew or bacteria. These tops are durable and can stand up to heavy use. Marks and scratches can be removed easily.

Call us for a quote or to discuss your solid surface table top project.

Now that you have found the perfect table tops for your facilities, you need to find the perfect bases.

In addition to manufacturing table tops, ABCrosby & Company provides our customers with a wide variety of high quality solid wood and metal table bases. Our bases are ruggedly built to survive the restaurant environment and complement your décor.

Standard table base height is 28.75" height but most bases are available in heights up to bar height. We can also provide bases with self-stabilizing glides.

Work with your sales rep to determine the best table base style for your facility.

If you do not see the style you want in this catalog, ask us to find your perfect base.

You have your table top and base. You now need chairs, which complement your custom tables.

ABCrosby offers standard and custom chairs proudly made in New England. We can deliver chairs built to your specific designs, create custom solutions, and adapt standard chairs to meet your needs. We work with architects and customers to make their own designs, but can also assist with design solutions.

Our standard chairs are made from Ash but we can provide chairs made in Maple, Cherry, Red Oak, White Oak, Birch, and Walnut.

Several of our chair styles are available with upholstered seats. Typically, the customer supplies the fabric. If customer wants us to provide the fabric, the chairs will have to be quoted as a custom order.

Our standard chairs are finished with a sealer coat and top coat of conversion varnish. Our chairs are stained using one of our standard stains shown in the catalog or your custom stain. There may be an additional charge for custom stains.

Contact us to discuss your commercial chair requirements.
