Quartz Restaurant Table Top – 24 Dia

Commercial grade 1 1/4" thick Quartz Table Tops with a 3/4" plywood core with epoxy and fiberglass backing. In Stock - Six Colors In Ten Sizes For Immediate Shipment.

The perfect table top for restaurants, hotels and clubs. Wood core Quartz tops are standard for the restaurant industry. 1-1/4" Table Top thickness, easy to install and lighter weight for portability. The standard eased edges and corners provide a finished appearance.

Plywood core Quartz restaurant table tops are heavy but less heavy than comparable size tops made of solid stone (about three quarters of the weight). The weight comparison between solid wood table tops and plywood core stone composite restaurant tables makes these table tops viable almost anywhere. For example, a 36" X 36" X 1 3/4" thick solid oak table top weighs around 70 lbs. A plywood core stone composite table top would weigh around 90 lbs. The weight of a quartz 24 diameter top is 36 lbs.

Construction: A 3/8" thick 93% quartz to 7% resin mix top layer is bonded to a 3/4" thick plywood core. Edges are also bonded to the plywood core. The underside of these Quartz table tops are moisture sealed with epoxy and fiberglass. Quartz table tops are scratch, stain and heat resistant. The sanitary table surface is perfect for restaurant use.

Quartz Table Top Care

We recommend the following for routine care:

- Clean with a damp cloth and gentle soap regularly.
- Long term storage should be in a dry area.
- Do not use vinegar, cleaners that contain acid, abrasive cleaners or furniture polish.

Quoted Base for Quartz Top: Cast Iron Round Series J318RD12

The Round Table Base line features stylish, domed bases utilizing 5 points of contact. The base itself is made with a domed bottom, using more cast iron material in a smaller footprint. The domed shape gives the base the additional weight needed to support various sized table tops. The additional weight incorporated into the domed shape is not usually found in similar bases.

Also available in Bar Height with or without Footring.

Model Number: JI3-18RDTP12

- Overall Height: 29"
- Weight: 33 lbs.
- Base Plate: 18" round cast iron
- Top Plate: 13" cast iron
- Metal Column: 3" diameter x 25" long, 16 gauge steel
