

No Spy AI on the Lenovo NVIDIA ThinkStation PGX

Private, enterprise-grade AI, built into the desktop hardware made for it.

You no longer have to choose between using powerful AI and keeping their data safe. No Spy AI, running on the Lenovo ThinkStation PGX, gives you both: a turnkey, offline AI platform with no cloud accounts, no new infrastructure, and no data leaving your building.

WHAT IT DOES FOR YOUR BUSINESS

Start Immediately

- In stock now, with no lead times
- Preloaded and ready out of the box
- Rental-first option to try before you buy

Low Cost to Run

- Plugs into a standard outlet, no special wiring or cooling
- Cuts cloud spend by running AI locally
- Frees your data center from development workloads

Your Data Stays Yours

- Fully air-gapped, with no internet required
- Meets strict security and compliance policies
- Secure sandbox for risk-free experimentation

Small Footprint, Serious Power

- Under 3 lbs and 5.9" square, smaller than most laptops
- 1 petaflop of on-device AI performance
- Portable enough to travel, powerful enough to matter

Powered by No Spy AI: Private AI for Regulated Environments

IBM Watson and select open-source LLMs run on hardware customized to your compliance needs, with support from initial planning through training.

- Enhanced security and transparency with open-source models
- AI model safety and regulation services
- On-site installation with power, cooling, and network isolation
- White-glove training and coaching
- Ongoing post-deployment support and maintenance
- Secure cloud options for hosted, compliance-controlled needs

SPECIFICATIONS AT A GLANCE

AI Performance	1 petaflop, on-device, no cloud required
Processor	NVIDIA GB10 Grace Blackwell Superchip (20-core ARM CPU)
Memory / Storage	128 GB unified memory, 2 TB SSD (up to 4 TB)
Power	240W, standard outlet, no special infrastructure
Connectivity	4x USB-C, HDMI 4K, Ethernet, Wi-Fi 7, Bluetooth 5.3
Size / Weight	5.9" x 5.9" x 2", under 3 lbs (1.2 kg)
Software	No Spy AI preloaded, ready on arrival
Warranty / Part #	One Year Premier 30KL0002US

Lenovo/NVIDIA PGX workstations are extremely rare, but we have one! Fully air-gapped for completely secure local AI prototyping. Contact us at 215-264-4521 or rick@tashman.tech to test it out. We will bring the machine, the expertise. No sales pressure. Just a chance to experience what's possible together.
