ProFlex Technologies – Flowline/Pipeline Leak Detection System. The newest premier pipeline leak detection system on the market. Attached for download is a basic PDF product flyer for the PipeSafe System, which can also be found on our website at www.proflextech.com - just click on the link for our onshore products and you will find a link to also download the flyer document should you wish to share the document this way.

ProFlex Technologies' Pipe-Safe System Leak Detection system works on any pipe, no matter the size, complexity, or properties that make up the pipe. Pipe-Safe LDS provides for land, surface and subsea applications. The leak detection system could also be deployed to cover individual pipeline segments or areas that require specific monitoring.

The PipeSafe leak detection system provides for:

- 'Signal Sensing and Data Processing System' is fully stand alone.
- System continuously monitors the pipeline flow characteristics for a leak event. In the event of a leak event, each 'Signal Sensing and Data Processing System' uses local processing algorithms to filter and process the event signal and transmit to our cloud based application, where leak determination is made.
- Notification of a leak event communication tools such as from desktop, mobile device. SCADA type system of the pipeline operator is available.
- High level of positional accuracy combined with advanced leak detection algorithms mean that the system has a virtually zero chance of false leak indications.

US Government Supply Vendor (GSA) – Verified Vendor

Recently approved vendor for supply of goods or services to Federal Government projects or services. We are a "SAM Verified Vendor" providing consulting, supply and service that caters to the Energy, Military, Infrastructure and Business Industry supporting US Government projects and after market requirements.

Also supporting Metropolitan and Government facility infrastructure. Processing and Product Transportation Systems (pipelines) that utilize government right of ways. We provide business development, marketing, product sales, representation and support, brokering, safety equipment and training, contracting, project management and third party assistance and expertise to the various energy and commercial sectors.

Service Contract

If your needs justify part time (or full time) short term or long term contract personnel please let us know how we can help.

Our business model is a fairly simple 'independent contractor' service. A contract is drawn between both companies to provide scope of work and T & C's, duration, compensation and content. A sample can be provided upon request.

For added information or questions as to how we can support your day-to-day requirements please contact:
